

TEXAS TRANSPORTATION COMMISSION

ALL Counties

MINUTE ORDER

Page 1 of 1

ALL Districts

The Government Code provides the statutory basis for each agency to submit a biennial request for legislative appropriations. The funds shown in Exhibit A are necessary to effectively accomplish the mission, goals, objectives, and strategies of the Texas Department of Transportation's (department) strategic planning and budget structure previously approved by the Office of the Governor, Budget Division and the Legislative Budget Board. The Texas Transportation Commission (commission) supports the mission, goals, objectives, strategies and funding requirements contained in Exhibit A.

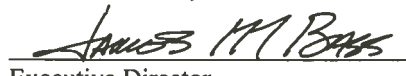

IT IS THEREFORE ORDERED by the commission that the executive director is authorized to submit a Legislative Appropriations Request to the Office of the Governor, Budget Division and the Legislative Budget Board in accordance with all prescribed guidelines in the amounts outlined in Exhibit A for Fiscal Year 2020 and Fiscal Year 2021.

IT IS FURTHER ORDERED that the executive director is hereby authorized to make adjustments to the requested levels as may be necessary in operations of the department.

Introduction

TxDOT's FY 2020-2021 Legislative Appropriations Request (LAR) includes a total funding request of \$32.68 billion.

TxDOT has implemented a performance-based process to fully utilize these funds, to guide project selection and to distribute the funds to projects in the Unified Transportation Program (UTP). The UTP is TxDOT's 10-year, midrange-planning document that guides the state's transportation project development. New revenues and funding streams have allowed TxDOT to implement scenario-based planning, which has taken the place of TxDOT's traditional project planning methodology. Rather than planning projects on a fiscally-constrained cash forecast, transportation planners may add projects to the UTP that include plans for potential funding rather than guaranteed funding. Scenario-based planning allows TxDOT to accelerate projects or reduce the amount of projects contracted, depending on how the funds are actually appropriated and realized.

Scenario-based planning allows TxDOT district offices and local planning organizations to adjust more readily to unpredictable economic factors such as the state's oil and gas production, the changing needs of the state budget and evolving local project needs. While the exact amounts of new funding in future years are still unknown, new revenues and scenario-based planning will allow the state's transportation experts to add new projects to the planning books that might not otherwise have been available. Most importantly, new funding provided by the Texas Legislature has enabled the Texas Transportation Commission (TTC) to adopt a 10-year UTP supporting more than \$75 billion in transportation project contracts.

Lettings Forecast

TxDOT has been working over the last biennium to streamline many of its processes. This streamlining provides greater transparency in TxDOT's communication with stakeholders including the legislature, business interests and the citizens of Texas. The two areas of greatest interest to stakeholders are project selection and funding. Project planning, selection and funding are inextricably linked and require long-range forecasting that extends beyond any individual biennium. In order to understand how TxDOT funds projects over time, it is important to review TxDOT's project letting process.

"Letting" is the process of providing notice, issuing proposals, receiving bids and awarding contracts for highway improvement projects. At this stage of development, TxDOT staff must have a realistic view of how much cash will be available over time to make progress payments on contracts awarded. TxDOT's cash forecast tracks expected letting awards, revenue sources and expenditures over the course of 10 years. TxDOT staff must ensure that there will be sufficient revenue to support its appropriations and project payment needs. Assurance that the revenue will be available beyond the biennium as projects continue to pay out over several years creates a necessity for TxDOT's funding forecast.

601 Department of Transportation

The General Appropriations Act (GAA) does not specify how much TxDOT may let for new highway improvement contracts. Instead, the GAA specifies how much is anticipated to be paid out on contracts during the biennium, recognizing that some contracts already exist and some will continue to pay out into the following biennium. The section below provides a summary of TxDOT revenues to pay for these projects, including new funding sources provided by the legislature in recent sessions.

Funding Sources**Traditional State Sources**

The State Highway Fund (SHF), also referred to as Fund 6, is TxDOT's primary fund. The SHF receives certain state revenues in the form of taxes and fees. The state constitution dedicates most of these taxes and fees to support public roadways and the commission may not spend these constitutionally dedicated revenues on other modes of transportation. Traditional TxDOT funding dedicated in the constitution primarily consists of motor vehicle fuel tax and motor vehicle registration fees. Non-constitutionally dedicated SHF monies from other taxes and fees must supply the funding for other, non-highway modes of transportation such as aviation services, public transportation, maritime and rail services. This non-constitutionally dedicated funding only amounts to about 3 percent of TxDOT's traditional state funding.

Proposition 1

The 83rd Legislature (Third Called Session) approved SJR 1, proposing a constitutional amendment creating Proposition 1, a new funding source. Texas voters overwhelmingly supported the Proposition 1 amendment by 80% approval in November 2014. Proposition 1 directs the deposit of a portion of oil and gas severance tax revenue to the SHF under certain circumstances. Proposition 1 funds may be used for the construction, maintenance, rehabilitation and acquisition of right-of-way for non-tolled public roadways. Proposition 1 funds are deposited into a subaccount within the SHF. In the month preceding each regular legislative session, the Joint Select Committee to Study the Balance of the Economic Stabilization Fund determines and adopts a sufficient balance of the Economic Stabilization Fund (ESF or "Rainy Day Fund"). The first twenty-five percent above the preset collection threshold consisting of 1987 oil and natural gas production tax levels is retained by the state's General Revenue (GR) fund. The remaining 75% of the severance tax is distributed evenly between the ESF and the SHF.

To date, the SHF has received four Proposition 1 deposits. The first deposit of Proposition 1 revenues to the SHF was in the amount of \$1.74 billion in the first half of FY 2015. Subsequent deposits have included \$1.13 billion in FY 2016, \$440 million in FY 2017 and \$734 million in FY 2018. The Comptroller estimates \$1.37 billion will be deposited in FY 2019. For FY 2020-2021, TxDOT expects appropriations from this funding source of \$2.3 billion in FY 2020 and \$1.2 billion in FY 2021. These totals include both new deposits and carry-over Proposition 1 funds from FY 2018-2019. The volatile nature of oil and gas production tax revenues and the legislative process of establishing the sufficient balance of the ESF make it difficult to predict future Proposition 1 deposits to the SHF; however, TxDOT continues to plan for projects in order to efficiently deliver the most projects possible. For long-term planning purposes, TxDOT estimates deposits of \$875 million per fiscal year, which is the 10-year historical average of surplus oil and gas taxes that would have been deposited to the SHF if Proposition 1 had been in effect over the last 10 years.

Proposition 7

On November 3, 2015, Texas voters, again, overwhelmingly approved a constitutional amendment in favor of increasing funding for the state's highway system. This time, voters approved the amendment with 83% of the vote. Proposition 7 authorized a portion of sales and use taxes (up to \$2.5 billion per year of the net revenue that exceeds \$28 billion from that source), as well as, beginning in FY 2020, a smaller portion of motor vehicle sales and rental taxes, to be deposited to the SHF. Proposition 7 funds may only be used to construct, maintain, or acquire right-of-way for public roads other than toll roads or to repay the principal of and interest on the commission's Proposition 12 general obligation bond issuances. The Comptroller made the first deposit of Proposition 7 funding for state highway improvement projects in August of 2018. TxDOT expects appropriations of \$4.73 billion in FY 2020 and of \$3.12 billion in FY 2021 from this revenue source for highway improvement projects. These totals include both new and carry-over appropriations of Proposition 7. TxDOT expects to receive multiple billion dollar deposits of Proposition 7 in the beginning and close of

Automated Budget and Evaluation System of Texas (ABEST)

601 Department of Transportation

FY 2019; therefore, some of the FY 2020-2021 appropriations will be considered “unexpended balances” from FY 2019. While these funds are present in the cash forecast and TxDOT anticipates their availability in the planning of projects, near-term construction contract letting will require close attention to ensure the appropriate funds are available for progress payments on projects.

Federal Funding

The “Fixing America’s Surface Transportation (FAST) Act” was signed into law on December 4, 2015. The FAST Act provides for five years of federal authorization and funding. Long-term federal funding provides TxDOT with greater financial certainty to oversee the development of large, multi-year projects going forward.

TxDOT estimates federal reimbursements and other federal appropriations for FY 2020 and FY 2021 at \$5.75 billion and \$5.57 billion respectively. The federal funding amounts that appear in the GAA are estimates of federal reimbursements for payments on projects that the Federal Highway Administration obligated with earlier authority as well as on projects obligated under the FAST Act.

Bond Programs

TxDOT’s primary bond programs consist of Texas Mobility Fund (TMF) bonds, State Highway Revenue Bonds (Proposition 14) and General Obligation Bonds (Proposition 12). Texas voters authorize the TMF in 2001 to help advance transportation projects, and the legislature identified revenues to be dedicated to the fund in 2003. House Bill 122 (84th Legislature, Regular Session) restricted the issuance of TMF bonds only for the purpose of refunding debt. TxDOT may continue to use TMF taxes and fees for the construction, reconstruction, acquisition and expansion of state highways and public transportation projects but may no longer expend such funds on tolled highways.

By the end of FY 2019, TxDOT will have spent all of the Proposition 14, Proposition 12 and TMF bond proceeds on transportation projects. TxDOT has included the debt service required for these bonds in the upcoming biennium in the budget request.

Full Time Equivalents (FTEs)

TxDOT’s LAR includes a request for additional FTEs to help manage the increased workload due to the significant increase in project funding. For the upcoming FY 2020-2021 biennium, TxDOT seeks to increase the agency’s FTE count by 313.5 for a total of 12,527 FTEs. This increase will assist existing TxDOT staff in the timely development and construction of new projects. TxDOT has worked diligently during the FY 2018-2019 biennium to plan for the most efficient delivery of new state highway dollars, and TxDOT requires new staff in the upcoming biennium to continue the accelerated schedule of project development and delivery.

Rider 2 - Capital Budget

TxDOT’s capital budget request includes several important initiatives related to property and technology. TxDOT expects to continue its deferred maintenance schedule and to remain on track with the overhaul of its legacy technology systems.

The legislature created a Joint Oversight Committee to prioritize funding for the maintenance of state buildings. In order to fulfill the legislative plan to service some of TxDOT’s older buildings, TxDOT requests funding of \$57 million in the deferred maintenance category for the FY 2020-2021 biennium and the appropriation authority to continue to fulfill the legislature’s deferred maintenance objectives. It should be noted that approximately \$116.0 million of the “Construction of Building and Facilities” capital budget request is for sites where extreme deferred maintenance needs dictate an economic decision to rebuild. Despite the categorization, these projects should be

601 Department of Transportation

considered as part of the deferred maintenance efforts.

Technological upgrades will facilitate the planning, financing and tracking of thousands of new state highway projects each year. TxDOT is in need of a system that updates decades-old planning and letting technology and facilitates critical tracking of project information from start to finish. Numerous interlocking planning documents and systems guide TxDOT and local officials over the multiyear project conception, planning and construction timeframe. The complexity of these systems contributes to the difficulty in achieving transparency in financial and transportation planning processes. TxDOT has achieved its goal of implementing a new financial, procurement and human resources system, and it is ready to begin updating its planning and letting technology. The ultimate goal is to have the planning, funding and execution of projects streamlined and in seamless communication with one another.

Austin Campus Consolidation project (Rider authority)

Last session, the legislature appropriated funding to acquire property, design a campus, and prepare the site in order to consolidate the TxDOT Riverside and Camp Hubbard campuses in one location. During this biennium, in the planning and design of the consolidated campus, TxDOT identified three additional campuses to add to this consolidation effort for even greater efficiency for TxDOT. Funding to construct this consolidated campus is needed in the upcoming FY 2020-2021 biennium because of the FY 2022 expiration of two of three land leases at the Riverside campus. TxDOT is asking the legislature for authority to issue approximately \$326 million in bonds through the Texas Public Finance Authority (TPFA) to finance the campus consolidation project. The bonds will be repaid over time through an interagency operating lease agreement with TPFA. Although the project expenditures could be paid with cash, that option would entail encumbering cash that is otherwise planned for highway improvements. The agency believes it is prudent to continue to fund highway improvement projects with cash and finance the new campus at a relatively low cost of borrowing.

Exceptional Item Requests

Most of TxDOT's funding supports only highway projects. Due to the limited availability of SHF revenues that are not dedicated by the constitution, TxDOT offers the following exceptional item requests (in priority order) for the legislature to assist in providing additional funding to address these important transportation system needs. These requests are in line with TxDOT's mission of providing a safe and reliable transportation system.

Debt Service for Highway Improvement General Obligation Bonds (Proposition 12)

The 85th Legislature appropriated Proposition 7 funds to pay for the debt service on Proposition 12 bonds, pursuant to Rider 42 of the FY 2018-2019 GAA. Increased GR funding to pay for Proposition 12 bond debt service would allow approximately \$619 million in planned funding to be used to deliver highways listed in the UTP. Approximately \$312 million in FY 2020 and \$307 million in FY 2021 is estimated to pay Proposition 12 bond debt service.

Veteran Toll Discount Program

TxDOT currently waives charges on certain Texas toll roads for individuals whose specialty license plates display the words "Disabled Veteran," "Purple Heart" or "Legion of Valor." TxDOT began waiving tolls for qualified veterans on all of its state-operated roads beginning in late December 2012. TxDOT requests \$9.285 million in FY 2020 and \$11.14 million in FY 2021 of GR to pay for exemptions to qualified veterans who use TxDOT-operated toll roads. In the Austin area, qualified veterans are able to drive free of charge on Loop 1, SH 45 North, SH 45 Southeast and SH 130 (Segments 1-4). TxDOT must reimburse the Central Texas Turnpike System (CTTS) to comply with bond agreements. TxDOT has been using funding from toll concessions to pay for reimbursements in recent years, but the funding will not be sufficient in future years; therefore, TxDOT is requesting \$20.4 million of GR for the FY 2020-2021 biennium to support legislative requests to exempt certain qualified veterans from toll

601 Department of Transportation

charges on CTTS roads.

Rail – South Orient Railroad (SORR)

(a) SORR - Sulfur Junction and Fort Stockton

TxDOT requests \$12.8 million in GR for FY 2020 and unexpended balance (UB) authority in FY 2021 for the rehabilitation of the state-owned South Orient Railroad (SORR) between Sulfur Junction and Fort Stockton (16 miles). This section of the rail line is constructed of rail manufactured in 1912 that is substandard for today's loadings and has a significant number of defective crossties, bridge defects and obstructed drainage ditches. Such conditions limit train speeds to 10 mph. This section of the rail line requires rehabilitation in order to continue to provide safe and efficient service to the seven customer facilities that are served within the project limits. Rehabilitation of this section will also increase efficiency and capacity, allowing increased freight rail movements in an energy resource area of Texas that is experiencing significant truck traffic volumes. TxDOT will require Texas Pacifico (the private operator) to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state.

(b) SORR - Fort Stockton and Belding

TxDOT requests \$8 million in GR for FY 2020 and unexpended balance (UB) authority in FY 2021 for the rehabilitation of the SORR between Fort Stockton and Belding (10 miles). This section of the rail line is constructed of rail manufactured in 1912 that is substandard for today's loadings and has a significant number of defective crossties, bridge defects, and obstructed drainage ditches. These conditions limit train speeds to 10 mph. This section of the rail line requires rehabilitation in order to continue to provide safe and efficient service to the customer facilities that are served within the project limits, which includes a siding that has been used for pipe transloading and could be used for sand transloading. Rehabilitation of this section will increase efficiency and capacity by allowing increased freight rail movements in an energy resource area of Texas that is experiencing significant truck traffic volumes. TxDOT will require Texas Pacifico to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state.

(c) SORR – Paisano and Presidio International Rail Bridge

TxDOT requests \$3 million in GR for FY 2020 and UB authority in FY 2021 for SORR rehabilitation from Paisano Junction to Presidio International Rail Bridge (72 miles). The federal government awarded TxDOT \$7 million in federal FASTLANE grant funding for the rehabilitation of the segment in 2017. Texas Pacifico will reconstruct the international rail bridge at Presidio in FY 2019 to enable the reopening of this rail gateway on the South Orient line. The section of the rail line from the international rail bridge to the interchange with Union Pacific outside Alpine is limited to 10 mph speeds due to defective crossties, bridges and obstructed drainage ditches. The rail line requires rehabilitation in order to make the South Orient competitive with trucks and other border gateways. TxDOT needs a total of \$10 million to fund this rehabilitation, requiring an additional \$3 million in GR (this request) to supplement the \$7 million FASTLANE grant. TxDOT will require Texas Pacifico to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state. Rehabilitation is essential to establish international service, providing another international rail gateway and for economic development activities in the region.

(d) SORR – Presidio Rail Gateway Inspection Facilities

TxDOT requests \$500,000 in GR for FY 2020 and UB authority in FY 2021 for the development of border inspection and security facilities for the SORR at Presidio. Texas Pacifico will reconstruct the international rail bridge in 2019 to enable international traffic through the Presidio rail gateway. U.S. Customs and Border Patrol will not permit any freight to cross the border until there are adequate facilities for the inspection of trains and their contents. Funding must be secured for the border inspection

601 Department of Transportation

facilities in order to begin international freight rail service on the SORR.

Aviation

TxDOT requests \$4 million in GR for each year of the upcoming biennium to increase the Aviation Facilities Development Program (AFDP) and Routine Airport Maintenance Program (RAMP), which support 278 Texas general aviation airports. Airport development needs at these airports exceed annual budget allocations by 68 percent. Funding for both programs has been level for the past seventeen years, resulting in a 51 percent decrease in purchasing power due to increases in construction costs. TxDOT would allocate the proposed funding annually as follows: \$3,200,000 to AFDP and \$800,000 to RAMP.

Public Transit Program

In the past year, the Public Transportation Advisory Committee (PTAC) reviewed existing transit service coverage and hours of operation in state-funded Urban and Rural Transit Districts across Texas. TxDOT's Public Transportation Division and the Texas A&M Transportation Institute researched options for increasing transit service coverage and hours of service on weekdays and Saturdays.

For the next biennium, PTAC recommends a funding increase of \$41 million per year to provide 14-hour/day weekday service for Texans in all counties and cities covered by a transit district. This is a committee priority for lifeline service that TxDOT and the PTAC hope can be addressed in the upcoming session, with an eye toward achieving a longer-term goal of 8-hour Saturday service and 14-hour weekday service statewide.

Transit provides lifeline services for many Texans. More than 70% of the approximately 30 million passenger trips taken on state-funded systems each year are for three primary purposes: work, shopping and medical visits. The increase would provide additional funding to create a 14-hour service day Monday- Friday statewide, plus annual funding to address the wear and tear on fleet vehicles associated with the increased service levels.

TxDOT is requesting \$41 million in GR for each year of the biennium to assist with fleet replenishment and formula funding. Additional state funding will partially offset the loss of purchasing power and population growth in rural areas. TxDOT will use these funds to match the growth in federal funds and improve services for the six million people living in rural Texas by improving access to employment, education, medical services and other necessities of daily life. If not approved, transit services will not be able to keep pace with the growing need and changing demographics, and rural residents will, over time, lose connectivity to services that address their needs.

Maritime

Texas ports serve as gateways to the state economy and play a vital role in creating jobs for Texans. Texas is the nation's leading export state and a leader in waterborne trade. Texas is in a unique position facing four major influences that will drastically impact the state and in particular, the maritime industry: the state's continued population boom, the dramatic growth of oil and gas production, the expansion of the Panama Canal and Mexico's expanding economy. These dynamic factors benefit the Texas economy, but they also increase demand on our ports.

(a) Ports Capital Program

TxDOT requests \$125 million in GR for FY 2020 and UB authority in FY 2021 for the Texas Ports Capital Program. The funds requested will allow Texas ports to make critical capital improvements that support port activity such as multi-modal connectivity enhancements, port expansions and replacement of outdated and failing port facilities. If funded, these projects will support improved logistics, increased capacity and enhanced safety to keep Texas ports competitive.

Ports submitted their respective projects to the Port Authority Advisory Committee. TxDOT staff scored and ranked the projects on benefits including economic impact,

601 Department of Transportation

operational impact, enhanced connectivity and improved safety/security. The PAAC and TxDOT staff also performed a technical review of all of the projects to ensure that they could be let within the FY 2020-21 biennium and could be completed before the end of FY 2024.

The funding would be a benefit to the state because many Texas ports have exhausted their funding tools and are beginning to fall behind competitor ports that receive state funding. Furthermore, Hurricane Harvey placed additional stress on the Texas port system through port closures and damage to port facilities.

(b) Ship Channel Improvement Revolving Fund

TxDOT requests \$450 million in FY 2020 and UB authority in FY 2021 to capitalize the Ship Channel Improvement Revolving Fund. With the requested funding, the commission would make loans available to navigation districts with ship channel improvement projects authorized by Congress to deepen or widen channels. Navigation districts serve as the non-federal sponsor for ship channels and share a portion of the cost of improvement projects along with the United States Army Corps of Engineers.

Container vessels, tankers and cruise ships have gotten progressively larger over the past several years, with the 2016 expansion of the Panama Canal exacerbating this trend. In order to remain competitive, Texas ports must deepen and widen the ship channels that serve their facilities to accommodate larger vessels. The cost of each project can total hundreds of millions of dollars, with one Texas project totaling over one billion dollars.

There are five eligible ship channel projects with navigation districts serving as non-federal sponsors responsible for funding a percentage of their project cost. This funding request is intended to cover the estimated drawdown for the eligible projects in Fiscal Years 2020-2021.

Rail – NETEX

TxDOT requests \$6 million in FY 2020 and \$4 million in FY 2021 for a limited amount of track and bridge rehabilitation on the Northeast Texas Rural Rail Transportation District (NETEX) freight rail line from Greenville to Mount Pleasant (66 miles). TxDOT owns 31 miles of the NETEX ROW and has a security interest in the infrastructure resulting from a grant funding agreement in 1996. Track speeds on the NETEX line are limited to 10 mph due to defective crossties and bridge deficiencies. The rail line continues to deteriorate due to the lack of past rehabilitation and funding. The rail line requires rehabilitation in order to continue providing service to existing customers and to attract new business to the line and the region. TxDOT would seek additional ownership of the line and infrastructure as a condition to expend funds for rehabilitating the line.

Rail – Heartland Flyer

TxDOT requests \$2.5 million in GR for each fiscal year of the biennium to provide a continued subsidy of Amtrak's Heartland Flyer passenger train between Fort Worth and Oklahoma City. TxDOT and the Oklahoma Department of Transportation (ODOT) have jointly funded this passenger service since 2009. It could cease operations if TxDOT does not continue to provide the subsidy.

Ten Percent Biennial Base Reduction – General Revenue-Related Funds

Unlike many other state agencies, TxDOT receives relatively small GR and GR-D appropriations. Most of TxDOT's appropriations are comprised of SHF funds, including federal reimbursements. TxDOT GR programs are very limited in two areas, the Crash Reporting and Analysis for Safer Highways (CRASH) application and Rail Safety. A 10% cut to GR for TxDOT is approximately \$388 thousand for the biennium. However, the rail safety program is self-funded with revenues collected from Texas railroad

Administrator's Statement

601 Department of Transportation

operators.

Conclusion

A vibrant economy depends on cost-competitive and on-time delivery of freight and access to jobs, schools, medical care, shopping and recreational opportunities. For an area to remain attractive to investors, goods must quickly get to market. The members of the Commission and TxDOT staff greatly appreciate all of the support the legislature and state leadership has provided to help TxDOT fulfill its mission. We look forward to working with state policymakers on identifying the solutions that will best protect Texans' quality of life and enhance the state's economic competitiveness.

-THIS PAGE INTENTIONALLY LEFT BLANK-

Texas Transportation Commission

The Texas Transportation Commission is the policy making board of the Texas Department of Transportation. Five Commission members, appointed by the Governor, meet monthly to set policy for the agency. The Chief Audit and Compliance Officer maintains departmental autonomy, with the function reporting directly to the Texas Transportation Commission and having unrestricted access as needed.

Executive Director

The Executive Director is the Chief Executive Officer. The Deputy Executive Director, Chief Financial Officer, Chief Engineer, and Chief Administrative Officer report directly to the Executive Director. Also reporting to the Executive Director:

- The **General Counsel Division (GCD)** provides legal counsel to the Texas Transportation Commission and TxDOT administration, districts and divisions. The GCD drafts administrative rules, provides legal interpretation/advice, and serves as legal counsel at commission meetings.
- The **Government Affairs Division (GOV)** leads TxDOT's engagement on both federal and state policy issues and is TxDOT's primary contact with the Governor's Office. At the federal level, GOV manages TxDOT's extensive financial and policy portfolio, which includes interactions with Congress, federal agencies and national organizations. At the state level, GOV is primarily responsible for TxDOT's interaction with the Texas Legislature. GOV's duties include responding to legislative and congressional requests with timely and accurate information; researching and analyzing policy issues; attending, monitoring and preparing testimony for legislative and congressional hearings; providing educational briefings to Texas Legislators, Members of Congress and their staffs; preparing informative transportation materials for legislative and congressional visits; and tracking legislation and communicating extensively with TxDOT's subject-matter experts.
- The **Chief of Staff** is responsible for providing direction and guidance in strategic operations and planning, and assisting in the implementation of TxDOT policies, programs and operating strategies consistent with federal and state laws and regulations and directives issued by the Executive Director and the Texas Transportation Commission.

The Director of Communications and Customer Service oversees divisions relating to TxDOT's public interaction in addition to media messaging, internal communications and travel information.

- The **Communications Division (CMD)** is comprised of four sections: Executive and Employee Communications, Creative Services, Media Relations and Public Information. The Executive and Employee Communications section oversees all communications to the internal agency workforce as well as handles external customer services. The Creative Services section integrates the agency's website services, media production and publishing and design services branches. The Media Relations section works with all forms of media to ensure that the media is reporting on TxDOT news accurately and in a timely fashion. The Public Information section directs and coordinates the activities of the agency's public information officers located across the state.

- The **Travel Information Division (TRV)** conducts the official state Tourist Information Program functions and is responsible for administering a program to stimulate travel to and within the state. TRV publishes the Texas Official Travel Map, the Texas State Travel Guide and *Texas Highways*, the state's official travel magazine, as well as other travel publications; and fulfills inquiries for Texas travel information. TRV operates the state's 12 Texas Travel Information Centers, including one within the Capitol Complex in Austin, and its employees serve as the state's frontline ambassadors providing travel and highway condition information. The division manages Drive Texas, TxDOT's highway condition information via an 800 number, along with an online graphic and static map. The division also manages the Don't Mess with Texas litter prevention campaign; the Adopt-a-Highway program, a grassroots partnership with Keep Texas Beautiful; and the Drive Clean Texas Program.

The Director of Strategy and Innovation is responsible for the direction, coordination and oversight of TxDOT's research program, technology implementation program and new product evaluation program.

- The **Information Management Division (IMD)** maintains systems computing capability, availability, reliability, and security. It is also responsible for new technology products, data management, service development, maintenance, enhancement and deployment of enterprise systems. The division provides Agency-wide support for the end user, computing experience through local and remote staff. IMD is also responsible for overseeing the enterprise technology architecture, co-developing complex IT and business solutions and records management with our stakeholders.
- The **Research and Technology Implementation Division (RTI)** manages the Cooperative Research Program, with the great majority of the research being conducted by state-supported universities. It also coordinates product evaluation for the department and manages the Implementation Program to provide funding for specific innovations output by the Research Program.
- The **Strategic Planning Division (STR)** provides analysis, observations, and solutions to guide the Department through strategic planning, performance measurement, risk prevention and mitigation analysis, process improvement, knowledge management, continuity of operations, and a forward-thinking approach for a better future of mobility for the state of Texas. The Strategic Planning Division is made up of a matrixed team that provides analysis and perspective to TxDOT leadership in an attempt to plan for the future of the Department. STR strives to prepare well-coordinated and unified strategic solutions that align with TxDOT's values, vision, mission, goals and objectives.

The Chief Audit and Compliance Officer is responsible for two Divisions:

- The **Internal Audit Division (AUD)** is established by the Texas Transportation Commission, and its responsibilities are defined by the Audit Subcommittee of the Commission as part of their oversight function. This structure ensures compliance with the Texas Internal Auditing Act and professional audit standards. AUD is governed by state legislation and professional standards. The division is evaluated every three years for compliance with these standards by external evaluation teams. The division focuses on providing assurance that TxDOT's business processes are designed and operating effectively to meet agency goals and objectives related to operations, reporting, and regulatory compliance.

- The **Compliance Division (CMP)** is established by the Texas Transportation Commission in conformance with the Texas Transportation Code 201.451, and oversees the department's compliance program. The mission of the Compliance Division is to foster stewardship by preventing and detecting fraud, waste, and abuse and providing assurance regarding the integrity and performance of programs managed by the Department and TxDOT business partners. This is accomplished through compliance evaluations, advisory (consulting) services, audits of entities that do business with the Department, investigations related to fraud, waste and abuse, and outreach with Department employees. CMP oversees the operation of TxDOT Watch (the department fraud, waste, and abuse hotline) and ensures the commission and department employees receive appropriate ethics training. All of the Department's operations are subject to review by the Compliance Division. The Audit Subcommittee of the Texas Transportation Commission and TxDOT's Chief Audit and Compliance Officer provide direction and oversight of the Compliance Division.

Deputy Executive Director

The **Deputy Executive Director** oversees six divisions: Aviation, Civil Rights, Maritime, Occupational Safety, Public Transportation, and Rail.

- The **Aviation Division (AVN)** serves as a focal point for statewide air transportation. The division's primary responsibilities are providing engineering, technical and financial assistance to Texas communities for planning, constructing and maintaining general aviation airports. The division develops and maintains a long-range statewide aviation facilities plan and also programs federal and state financial assistance for airport development. The division provides aviation education programs regularly to foster and promote safety and professionalism in all aspects of aviation. The division is actively involved in working with communities to improve scheduled air service opportunities. The Aviation Advisory Committee, a six-member committee appointed by the Texas Transportation Commission, advises TxDOT and the Aviation Division. In addition, AVN provides aircraft flight services to transport state officials and state employees for business purposes, and maintains state owned aircraft.
- The **Civil Rights Division (CIV)** is responsible for promoting diversity and inclusion in the internal operations and external programs of the Department by effectively working alongside districts, divisions, and stakeholders to achieve civil rights related objectives. CIV manages a variety of economic development programs for small businesses and workforce development. These programs include Disadvantaged Business Enterprise, Historically Underutilized Business, and Small Business Enterprise contracting programs. The On-the-Job Training, National Summer Training Institute, and Texas Construction Career Academy provide career and skills based training opportunities for individuals interested in working in the highway construction industry. CIV also promotes accessibility through the Americans with Disabilities Act compliance program and manages the Title VI program to ensure non-discrimination. Additional programs include Affirmative Action, Diversity, and Equal Employment Opportunity. CIV provides training, certifies businesses for the small business programs, performs contract compliance reviews, conducts program outreach efforts, and monitors sub-recipients and programs.
- The **Maritime Division (MRD)** supports the development of high value growth in Texas' maritime system, by taking an integrated and systems approach to examine the needs and challenges of Texas ports and waterway system and potential solutions. MRD provides a vehicle for TxDOT to work with national and statewide transportation policy-makers, port and waterway operators, the private sector freight community, and local partners to address specific system-wide issues facing Texas Ports and waterway system. This support includes serving as a resource for Texas ports and working with them to address port and maritime needs; working to increase use of the Gulf Intracoastal Waterway (GIWW); and promoting waterborne transportation and related intermodal projects essential to maintain Texas' economic competitiveness.

- The **Occupational Safety Division (OCC)** directs and oversees the department's safety and risk management programs. The division is responsible for creating and sustaining an organizational culture designed to eliminate preventable incidents and injuries through the use of program tools, applicable safety/skills training, and department wide initiatives, such as the implementation of Safety: Mission Zero. The division administers the Department's self-insured workers' compensation program, ensuring that injured TxDOT employees receive appropriate income benefits and the reasonable and necessary medical care to facilitate their safe and timely return to employment. The division reduces TxDOT's exposure to financial risk by managing all tort and liability claims (third party property damage and bodily injury claims), providing oversight of pre-employment physicals, and coordinating statewide access to clinics to perform substance abuse testing.
- The **Public Transportation Division (PTN)** is responsible for encouraging, fostering and assisting public transportation in Texas. The division promotes cycling and walking as alternatives to driving, and continually works to make roadways more bike-friendly. The division grants state and federal funds for public transportation projects. Additionally, PTN works in partnership with the Federal Transit Administration to support and monitor rural and small urban intercity bus transportation, job access and reverse commute service, and various capital projects including transit vehicle procurement and facility construction. The division sponsors and monitors research and development in public transportation. PTN also provides technical assistance, training and planning support to the transit industry. State statute additionally charges TxDOT with the responsibility of regional planning for public transportation, and as such PTN oversees and assists regions within the state as they proceed to develop local regional plans. PTN administers the Transportation Alternatives Program (TAP) and conducts a competitive project selection process every other year for areas of the state under 200,000 population for this federal construction program, which is part of the Surface Transportation Program (STP). The TAP provides funding for a variety of alternative transportation projects, including on- and off-system pedestrian and bicycle facilities, infrastructure for non-driver access to public transportation, projects that enhance mobility, and Safe Routes to School infrastructure projects. PTN provides support to two legislative advisory committees: Public Transportation Advisory Committee (PTAC) and Bicycle Advisory Committee (BAC). Both Committees advise the Texas Transportation Commission (TTC) on matters of their respective areas. Members of PTAC are appointed by the Texas Governor, the Lieutenant Governor, and the Speaker of the House of Representatives. Members of BAC are appointed by the TTC for a three-year term, according to rule.
- The **Rail Division (RRD)** is responsible for the agency's rail planning and rail project work. RRD provides project management and oversight for state and federally funded rail programs and projects. The division manages lease and operating agreements for rail services on state-owned facilities and state subsidized passenger rail routes. RRD's Rail Safety Section participates with the Federal Railroad Administration in inspecting the facilities and operations of the railroads within the state. RRD's Rail Highway Section administers funding and projects for improving rail highway crossings within the state.

Chief Engineer

The Chief Engineer oversees all key operations involved in the execution of delivery of the Unified Transportation Program (estimated at \$7B/year), engineering operations, ROW, roadway and bridge design, traffic and safety operations, environmental, construction and maintenance operations, right of way and professional engineering procurement. **Three Directors report to the Chief Engineer: the Director of Engineering and Safety Operations, the Director of District Operations, and the Director of Project Planning and Development.**

The Director of Engineering and Safety Operations oversees five major transportation divisions, involved primarily in bridge, design, construction, maintenance, and control of traffic of the State's roads, highways, and bridges.

- The **Bridge Division (BRG)** provides direct assistance to TxDOT districts in matters regarding bridge project development, design, plan preparation, plan review, construction, maintenance, and inspection. Bridge project development encompasses elements such as preliminary engineering, programming, and guidance for developing bridge projects across the state. The division is responsible for reviewing preliminary bridge layouts, construction plans, specifications, and estimates for bridges designed by both department personnel and consulting engineering firms. Design and plan preparation responsibilities include bridges, geotechnical structures, overhead sign bridges, and other traffic structures. The division provides assistance with bridge construction and maintenance problems, damaged structures, and construction inspection services. In addition, BRG manages the federally mandated bridge inspection program for the state's 54,000 bridges and also oversees programs for replacement and rehabilitation of on-and-off system, structurally deficient and functionally obsolete bridges.
- The **Construction Division (CST)** provides oversight for construction contract administration, to include contract payment, construction regulatory compliance, and project inspection and materials testing for all department construction contracts. The division is responsible for contractor pre-qualified, bid proposal issuance, and construction and maintenance contracts letting. The division provides consultative support to districts on project management, administration and inspection and materials testing from contract pre-letting to final project acceptance. CST is also responsible for coordinating with the Federal Highway Administration (FHWA) to assure the overall effectiveness of the construction oversight program. The division is responsible for materials quality acceptance for construction and maintenance materials statewide.
- The **Design Division (DES)** provides guidance and design support to the divisions in the development of highway construction projects on interstate, state, rural, and urban highway systems. The division's design responsibilities begin with the preliminary stage of each project, and continue through the detailed design stages to the completion of plans, specifications and estimates up to release for construction bidding. More specifically, this division develops geometric design criteria, prepares design standards, provides federal oversight responsibility for project development, provides hydraulic analyses and design support, provides traffic simulation and safety analysis support, guides the implementation of state-of-the-art design software tools, provides preliminary design reviews for the districts in accordance with established design criteria, guidelines/standards/laws, develops landscape design, manages the statewide Curb Ramp Program, and processes plans and bid proposals to letting. The division's photogrammetry section provides district personnel with design-level mapping and orthophotography used in the daily engineering operations of the department.
- The **Maintenance Division (MNT)** provides statewide administration and oversight of the maintenance budget, statewide maintenance operations, development of safety rest areas and other roadway facilities, the statewide vegetation management program, and statewide planning. MNT also oversees and supports the maintenance contracting program, emergency contracting and the State Use Program. The division conducts statewide maintenance condition assessments, develops and administers performance based roadway and rest area maintenance contracts, regulates aggregate quarries and pits, and manages the maintenance management system. MNT develops and supports pavement asset management plans, conducts pavement evaluations, coordinates pavement design and management, and maintains and oversees the department's pavement management information system. The division also coordinates the department's emergency management operations.

- The **Traffic Operations Division (TRF)** is responsible for the engineering design of traffic control devices, roadway illumination, traffic signals, the review and analysis of speed zone requests, the review of traffic engineering related aspects of construction plans, the collection of crash records and analysis of crash data, coordinating and performing rail safety regulatory inspection activities with the Federal Railroad Administration (FRA), and coordinating highway-rail project construction, maintenance and safety improvement work activities between TxDOT and railroad companies. The division assists and supports the districts in the research, development, and implementation of the statewide Traffic Management Systems Program designed to improve the safety and efficiency of our highway system. TRF also administers the Texas Traffic Safety Program, the Highway Safety Improvement Program, the Texas Safety Bond Program, the Texas Traffic Assessment Program, and the Fatality Analysis Reporting System. The division also develops, publishes and distributes the Texas Manual on Uniform Traffic Control Devices which is used by all road authorities in Texas.

The Director of District Operations oversees the districts located statewide. The department conducts its primary activities in 25 geographical districts. Varying climate, soil, and differing needs of local populations make decentralization of department operations necessary. Each district, managed by a district engineer, is responsible for the design, location, construction, and maintenance of its area transportation systems. Local field offices within districts are known as area offices. TxDOT district offices are located in Abilene, Amarillo, Atlanta, Austin, Beaumont, Brownwood, Bryan, Childress, Corpus Christi, Dallas, El Paso, Fort Worth, Houston, Laredo, Lubbock, Lufkin, Odessa, Paris, Pharr, San Angelo, San Antonio, Tyler, Waco, Wichita Falls, and Yoakum.

The Director of Project Planning and Development oversees five divisions directly involved with planning high efficiency and environmental affairs related to the use of state highways and roads, rail system, and ports operation. Additionally, this director oversees the planning and feasibility of regional and federal corridors throughout the state and professional procurement.

- The **Environmental Affairs Division (ENV)** oversees the department's environmental program. The division is responsible for recommending policies and developing guidance and procedures for project investigations, public involvement, and environmental, social and economic studies as part of the project development process. The division is also responsible for environmental approvals for projects in compliance with state and federal requirements. ENV is the department's environmental liaison with state and federal resource agencies, environmental and special-interest groups, and the public. The division also provides assistance with hazardous materials and other environmental issues on construction and maintenance projects and on department property. ENV also administers contracts to support projects statewide.
- The **Professional Engineering Procurement Services (PEPS) Division** is responsible for procuring engineering, architectural, and survey services using the qualifications-based process outlined by the legislature and prescribed in the Texas Administrative Code. This division is a single centralized organization with the ability to manage procurements and the procurement process. PEPS works directly with districts and divisions to determine their needs, compares that with historical usage, and procures in scheduled waves so that there is never a stock-out with regard to professional services.

- The **Right of Way Division (ROW)** manages the acquisition of right of way and other real-property interests required for TxDOT transportation projects. It also coordinates eminent-domain proceedings with the Texas Attorney General and administers the adjustment and relocation of utilities on right-of-way acquisition projects. ROW administers the Relocation Assistance Program, and activities for the disposition of real property, including identifying on-going alternative revenue strategies to leverage the TxDOT land portfolio. ROW manages right of way financial activities, professional service contracts for right of way acquisition and real estate appraisal services, as well as, non-professional blanket contracts for utility accommodation, coordination, and verification; asbestos testing; and demolition and disposal services. ROW also performs the regulatory function for the orderly and effective control of outdoor advertising and junkyards along interstate and primary highways under Federal Highway Beautification Act and along all highways and roads located outside of corporate limits of municipalities in accordance with the State Rural Roads Act.
- The **Transportation Planning and Programming Division (TPP)** is responsible for the Texas Transportation Plan, the Texas Freight Mobility Plan, border and international planning, engineering corridor studies, coordination with Metropolitan Planning Organization (MPO) planning activities, the Unified Transportation Program, the Statewide Transportation Improvement Program, and the Economically Disadvantaged Counties Program. The division is responsible for providing data support for planning and design, road inventory, railroad crossing inventory, reference marker locations, mapping and map distribution, the Federal Highway Performance Monitoring System, traffic counts and traffic volume analysis, traffic forecasting, travel demand modeling, vehicle weight and classification studies, and speed and origin-destination studies. The division is responsible for the Texas State Planning and Research Work Program (Part I) and serving as the department's primary clearinghouse on matters pertaining to the public's input into agency decisions on transportation improvements, including the development and implementation of policies and procedures to guide department personnel on public involvement initiatives.
- The **Transportation Programs Division (TPD)** is responsible for alignment of evolving business practices, technology, and legislative policy to ensure TxDOT is prepared to deliver our transportation programs. To accomplish this, we work with districts and divisions to identify and implement consistent standards and procedures in the department's project delivery processes to achieve outstanding safety, planning, design, construction, and maintenance performance. These processes must be supported by portfolio and project management systems and training that enable TxDOT personnel to perform each of their tasks in a timely and effective manner.

Chief Financial Officer

The Chief Financial Officer of TxDOT oversees the agency's accounting, budget preparation, proposed legislation regarding finances and budget, as well as state-owned toll operations and debt management.

- The **Financial Management Division (FIN)** is responsible for TxDOT's accounting, forecasting, budgeting, payment for all goods and services, and processing of all receipts and revenues. The division analyzes financial effects of proposed legislation on TxDOT and performs policy analysis and review. The division is also responsible for the scheduling and letting management of all transportation projects.

- The **Project Finance, Debt and Strategic Management Division (PFD)** is responsible for management of the department's project financing, debt management and strategic contracts programs. This includes the Texas Transportation Commission's and related entities' debt issuances, monitoring and directing investments, ensuring compliance with the Commission's policies, state/federal regulations and bond covenants, and oversight and procurement of the department's alternative delivery program. The division currently oversees obligations supported with revenues of the State Highway Fund, the Texas Mobility Fund, the Central Texas Turnpike System, portions of the Grand Parkway System, as well as Highway Improvement General Obligation bonds, which are supported by the general revenues of the state. The division oversees project finance activities which can include the use of federal Transportation Infrastructure Finance and Innovation (TIFIA) loan program, private activity bonds or other forms of debt supported by project revenue. PFD manages State Infrastructure Bank loan program, toll equity program, pass-through financing and activities related to transportation reinvestment zones. The division further provides resources and consultation to the Districts to support the department's alternative delivery program (Design-Build contracts and Comprehensive Development Agreements) to deliver large and complex projects. PFD leads the procurement of these projects and provides contracting support to the Districts to ensure statewide programmatic consistency and contract compliance on alternative delivery projects.
- The **Toll Operations Division (TOD)** administers and oversees the toll operations of TxDOT operated toll facilities. This includes lane equipment, back office systems, and customer service support for customers. TOD also provides for traffic and revenue analysis and support of lane and back office services for projects developed under comprehensive development agreements statewide.

Chief Administrative Officer

The Chief Administrative Officer oversees a wide range of divisions which cover the functions of Contract Services, Procurement, Fleet Oversight, Human Resources, and Support Services.

- The **Contract Services Division (CSD)** oversees the creation and administration of negotiated contracts. This includes proposing policy, providing training, reviewing contracts, and supporting department personnel. Negotiated contracts include, among others, professional services contracts, advance funding agreements, interagency contracts, inter-local contracts, pass-through agreements, interstate agreements, state use contracts, and traffic agreements.
- The **Procurement Division (PRO)** is the purchasing office for TxDOT procuring goods and non-professional services. PRO also assists with specification development, interpretation of purchasing law, policies and procedures, coordinates the payment card program and purchasing system, and provides procurement training.
- The **Fleet Operation Division (FOD)** is responsible for safely and efficiently delivering fleet solutions and resources to support emergency response operations, customer success and TxDOT goals. The division supports TxDOT's mission and goals by preserving and maintaining more than 13,000 fleet assets through a comprehensive preventive maintenance, repair and replacement program. FOD establishes policies and procedures for fleet management in each of the 25 districts and TxDOT headquarters and provides technical assistance with the department's fleet management technology system. FOD also provides oversight of 28 fleet repair and maintenance shops and a production shop that manufactures TxDOT specific equipment and parts. FOD works closely with districts and divisions to develop department-wide plans for fleet utilization, acquisition, maintenance, and emergency management. The division monitors, evaluates, and assists districts and divisions with any equipment-related issues. The division also manages the department's alternative fuels program.

- The **Human Resources Division (HRD)** oversees all statewide policies, procedures and programs related to supporting and managing TxDOT's human capital. This includes recruiting and staffing, new hire onboarding, compensation, position management, benefits and insurance, ethics, EEO, wellness, training, career development, performance management, employee relations, garnishments, leave, timesheets, teleworking, flex schedules, tuition assistance substance abuse, violence prevention, service and retirement awards, EAP, appeals, collaborative resolution, and workforce reporting. HRD advises on ethical matters and reviews EEO internal complaints; serves as consultant on employee relations issues; reviews operational programs to mitigate and prevent risk; and leads TxDOT's training and development activities. The division maintains a business title classification system to ensure salary parity internally and with other transportation entities and to monitor department career progression. HRD develops human resources performance objectives through workforce metrics and trend analysis.
- The **Support Services Division (SSD)** is responsible for the statewide planning, management and maintenance of TxDOT facilities, including the capital program, lease management, asset management, energy conservation, space planning, and physical security. SSD oversees statewide roadway materials inventory, assists the districts in the management of their inventory levels, and operates four regionally located distribution centers for long-lead and hard-to-get roadway items. SSD operates two sign fabrication shops, serving the maintenance sections special traffic sign needs, as well as, oversees the fabrication of the prison-built roadway sign operation of the Texas Department of Criminal Justice. SSD serves as the central point of contact to other agencies for property management (personal, real and linear assets), and administers numerous other agency-wide programs, including reduce, re-use and recycle efforts, reprographic and letting services, offset printing, and mail and logistics. SSD provides budget and resource support to the districts.

CERTIFICATE

Agency Name Texas Department of Transportation

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2018-19 GAA).

Budget Overview - Biennial Amounts
86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

601 Department of Transportation											
Appropriation Years: 2020-21											
	GENERAL REVENUE FUNDS		GR DEDICATED		FEDERAL FUNDS		OTHER FUNDS		ALL FUNDS		EXCEPTIONAL ITEM FUNDS
	2018-19	2020-21	2018-19	2020-21	2018-19	2020-21	2018-19	2020-21	2018-19	2020-21	2020-21
Goal: 1. Project Development and Delivery											
1.1.1. Plan/Design/Manage					422,644,486	399,693,363	442,153,647	560,358,083	864,798,133	960,051,446	
1.1.2. Contracted Planning And Design					672,276,535	537,829,836	856,645,066	419,089,508	1,528,921,601	956,919,344	
1.1.3. Right-Of-Way Acquisition					792,088,412	1,032,875,050	906,576,622	680,812,698	1,698,665,034	1,713,687,748	
1.1.4. Construction Contracts					3,282,416,204	4,476,603,720	2,070,621,762	949,383,512	5,353,037,966	5,425,987,232	
1.1.5. Maintenance Contracts					4,921,374,987	4,050,626,857	1,191,704,202	714,379,428	6,113,079,189	4,765,006,285	
1.1.6. Proposition 1, 2014							2,681,335,049	3,516,415,720	2,681,335,049	3,516,415,720	
1.1.7. Proposition 7, 2015							2,218,936,473	7,253,123,199	2,218,936,473	7,253,123,199	
1.1.8. Construction Grants & Services					303,769,322	322,535,053	196,045,557	414,829,711	499,814,879	737,364,764	
Total, Goal					10,394,569,946	10,820,163,879	10,564,018,378	14,508,391,859	20,958,588,324	25,328,555,738	
Goal: 2. Routine Transportation System Maintenance											
2.1.1. Contracted Routine Maintenance					109,188,230		1,485,469,479	1,970,483,025	1,594,657,709	1,970,483,025	20,425,000
2.1.2. Routine Maintenance					22,519,310		1,615,451,962	1,465,542,787	1,637,971,272	1,465,542,787	
2.1.3. Ferry Operations							103,680,862	108,506,040	103,680,862	108,506,040	
Total, Goal					131,707,540		3,204,602,303	3,544,531,852	3,336,309,843	3,544,531,852	20,425,000
Goal: 3. Optimize Services and Systems											
3.1.1. Public Transportation					133,412,797	130,902,953	75,175,083	74,691,724	208,587,880	205,594,677	82,000,000
3.2.1. Traffic Safety	1,460,436	1,460,436			101,420,565	100,937,020	18,286,884	20,306,152	121,167,885	122,703,608	
3.3.1. Travel Information							39,178,792	39,299,128	39,178,792	39,299,128	
3.4.1. Research					41,008,801	39,602,641	12,112,848	11,247,095	53,121,649	50,849,736	
3.5.1. Aviation Services					100,000,000	100,000,000	89,158,784	77,409,930	189,158,784	177,409,930	8,000,000
3.6.1. Gulf Waterway							1,851,402	1,865,487	1,851,402	1,865,487	575,000,000
Total, Goal	1,460,436	1,460,436			375,842,163	371,442,614	235,763,793	224,819,516	613,066,392	597,722,566	665,000,000
Goal: 4. Enhance Rail Transportation											
4.1.1. Rail Plan/Design/Manage							7,100,206	6,022,267	7,100,206	6,022,267	
4.1.2. Contract Rail Plan/Design					11,911,066	6,600,000	400,000	400,000	12,311,066	7,000,000	
4.1.3. Rail Construction					15,316,841		6,458,038		21,774,879		39,300,000
4.1.4. Rail Safety	2,416,118	2,416,118							2,416,118	2,416,118

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports the management and road development required to contribute to the expansion of the transportation system. Texas Department of Transportation (TxDOT) engineers develop long-range road forecasting, road and bridge design, environmental studies, and work closely with Metropolitan Planning Organizations (MPOs) and other political subdivisions to coordinate the development of a multimodal transportation plan.

This strategy funds a variety of functions like studying road inventories, calculating traffic volume counts, assessing environmental impacts, and performing traffic and revenue studies. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Chapter 201 Subchapter C, and Section 203.002)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Efficient, cooperative communication between the state and external partners must exist to effectively implement this strategy. Procedures are regularly reviewed to enhance the delivery of construction projects at the lowest reasonable costs. External factors impacting this strategy include state and federal legislation, ability to obtain the necessary rights of way, utility adjustments, weather conditions, environmental issues, timing and funding associated with plan development activities, and public hearings.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

Under the authority of eminent domain, this strategy is used to acquire right-of-way required for the construction of transportation projects. The acquisition process includes parcels of real estate, the adjustment of utility facilities and providing relocation assistance to property owners and tenants of business and residential properties that are displaced in the construction of the transportation project. Cities and counties are authorized to acquire right-of-way on behalf of the state and are eligible to be reimbursed not less than 90 percent of their acquisition costs. The expenditures in this strategy support the following goals of the Texas Transportation Commission to : Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Section 91.091, Chapter 203, Subchapter D and E, Sections 224.005 and 224.008; Property Code, Section 21.046)

601 Department of Transportation

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The cost of acquiring right-of-way is directly related to the location of the proposed transportation projects. Commercial properties improved with occupied buildings and other improvements are generally the more expensive properties to acquire. Owners are entitled to receive just compensation; however, when owners reject the agency's offer for negotiated purchase, and eminent domain proceedings are necessary, the amount paid for right-of-way can be expected to significantly increase because of awards made by special commissioners and juries. Relocation assistance benefits must be paid to the owners and occupants of property who are displaced by the highway project. In most situations, the cost of the adjustment (relocation) of utilities located on the new right-of-way must be paid to the owners of the utilities. Standard operating procedures and automated systems have been implemented to increase the efficiency of right-of-way acquisition operations. Emphasis is given to settlement of condemnation cases to expedite possession and minimize increased costs. Donation of right-of-way by landowners is encouraged to realize reduction to right-of-way costs.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports construction contracts let in the previous and current biennia, design-build contracts and Comprehensive Development Agreements (CDAs) for roads, bridges, and other transportation facility construction to increase mobility. This strategy represents actual work disbursements, meaning payments are processed and distributed as the work is completed and often continue for many years after the project begins.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium, as well as, allowing an increase in the appropriation should additional funds become available in the State Highway Fund, which is expected to continue.

(Transportation Code, Sections 201.002, 201.102, 201.103, 203.002, 203.003, 203.021, 223.201-223.250, Chapter 224, Subchapter B, and 471.004)

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

Efficient cooperative communication between the state and private sector must exist to cost effectively implement this strategy. Communications are continually reviewed to enhance delivery of construction projects at the lowest reasonable costs. External factors impacting this strategy include state and federal legislation, ability to obtain the necessary rights of way, utility adjustments, weather conditions, environmental issues, plan development timing/funding activities and public hearings. Regarding ferries, the extreme corrosive nature of the environment, causing deterioration of the infrastructure supporting the ferry system, has resulted in higher costs to replace and maintain that infrastructure.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports maintenance projects which are let in prior and current biennia, and includes work associated with preventive maintenance and rehabilitation accomplished through the use of external contractors. The Texas Transportation Commission has established preservation of the highway system as a major priority to ensure that the highway system is preserved in the most cost- effective and efficient manner through a planned cycle of repair, reconstruction, and rehabilitation. Work such as major rehabilitation of lanes, adding shoulders to existing lanes, overlays and any other activity that extends the useful life of the pavement is included in this strategy. Expenditures in the Maintenance Contracts appropriation support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees. This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Sections 201.103, 203.002)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

601 Department of Transportation

GOAL: 1 Project Development and Delivery
OBJECTIVE: 1 Effective Project Planning, Development, and Management Service Categories:
STRATEGY: 5 Maintenance Contracts Service: 11 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

External factors such as age of the system, increased usage, weight of trucks, soils, and weather have the most significant impact on the condition of the system. The increased usage of the Texas transportation system by the energy sector has greatly increased the need for additional resources in this strategy. A lack of resources would result in an increased rate of deterioration of the system and increased rehabilitation and reconstruction needs in the future.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy supports the construction of roads, bridges, and other facilities funded through toll equity, and pass-through tolling. The Construction Grants and Services strategy includes projects contracted directly with outside firms as well as local governments. Pass-through tolling allows local governmental entities, to advance projects by providing local funding or bonds up-front to later be reimbursed by TxDOT. This strategy represents disbursements for State Infrastructure Bank loans and Border Colonia Access Program payments to counties on actual construction work, and includes no direct personnel costs. This strategy supports the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

The strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year to the second year of the biennium. This U.B. authority is requested to continue in the next biennium. Upon LBB approval, the strategy's "estimated" feature allows the appropriation to be increased should additional funds become available in the State Highway Fund, which is requested to continue.

(Transportation Code, Sections 201.002, 201.102, 201.103, 203.002, 203.003, 203.021, 222.104, 256, and 471.004; Texas Constitution, Article 3, Section 49; Texas Government Code, Chapter 1403)

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy includes work associated with routine and preventive maintenance accomplished through the use of external contractors. The Texas Transportation Commission has established preservation of the highway system as a major priority. This will ensure that the highway system is preserved in the most cost effective and efficient manner through a planned cycle of repair and preventive maintenance. In addition to routine maintenance of roadway surfaces and bridges, this strategy includes highway markings, signs, traffic signal systems, right of way mowing, litter removal, contracts for emergency repairs, and ferry facility maintenance. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Sections 201.103, 203.002, and Chapter 224, Subchapter B)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors such as age of the system, increased usage, weight of trucks, soils, and weather, have the most significant impact on the condition of the system. The increased usage of the Texas transportation system by the energy sector has greatly increased the need for additional resources in this strategy. A lack of resources would result in an increased rate of deterioration of the system and increased rehabilitation and reconstruction needs in the future.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports the operation of ferry systems twenty-four hours a day, seven days a week in Port Aransas near Corpus Christi and Galveston-Port Bolivar. Included in this appropriation are funds for ferry crews, security, fuel, and other expenses related to the operation of the ferry boats. Construction of ferry boats and maintenance to the ferry facilities have been moved to the construction and maintenance strategies. This strategy continues to expand as industry and tourism develops in those areas served by ferries. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Section 342.001)

------	-------------	----------	----------	----------	---------	---------

Tourism, local development, weather (hurricanes, tropical storms, etc.), environmental factors and safety, and the shipping industry are all factors that have significant impact on ferry operations. Traffic volume and the prevention of public dissatisfaction with delays and long lines also impact the operations of Texas Ferry Systems. Ferry downtime may increase due to mechanical failure and the high cost of stocking the required replacement parts, thus extending wait times. Additional examples of factors impacting the strategy are the capacity of the system, by adding two higher capacity ferries to decrease the wait time at the Port Aransas Ferry System, the future replacement of aging ferries, increasing staff, security, diesel fuel expense, and maintenance requirements. The extreme corrosive nature of the environment, causing deterioration of the infrastructure supporting the ferry system, has required higher costs to replace and maintain that infrastructure. The requirement to dredge twice a year at the Galveston-Port Bolivar Ferry System due to a reduction of the area dredged by the Corps of Engineers and the increased silting of the area has resulted in increased expenditures.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports the department's effort to support public transportation projects statewide by assisting urban and rural transportation providers , communities, nonprofit organizations, and other eligible entities in the development and delivery of public transportation services to the general public. This strategy also provides for the monitoring and allocating of Federal Transit Administration funds as well as monitoring state, federal and local legislation and regulations affecting public transportation. In addition, this strategy provides the funding authority for public transportation projects through the distribution of federal apportioned dollars and state funds in support of personal mobility and relief from congested traffic.

This strategy also includes the federally-required State Safety Oversight Program, which oversees and enforces the safety of rail fixed-guideway systems in Texas.

This agency sponsors forums and training opportunities throughout the year which bring together local, regional, state, and federal public transportation officials to learn and discuss current areas of interest and to exchange ideas on developing and promoting public transportation in the state. Metropolitan Transit Authorities (MTAs) are statutorily prohibited from receiving state funding through TxDOT.

(Transportation Code, Chapters 455, 456 & 461)

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

The development and/or enhancement of public transportation are often difficult because it requires substantial amounts of monies. The resources of government (federal, state and local) have not kept pace with inflation and population growth in meeting the capital and operating needs necessary to accomplish this. These limited resources, primarily used to maintain established systems, constrain efforts to expand and/or establish new systems in areas that are currently not served or underserved particularly due to population growth. The transit systems located in areas adjacent to the United States/Mexico border realize an additional burden placed on their resources due to temporary visitors from Mexico. Likewise, systems are expecting increasing demands as the population continues to age and urban areas become increasingly congested, at the same time the costs of building and expanding services are increasing.

601 Department of Transportation

GOAL: 3 Optimize Services and Systems
OBJECTIVE: 2 Enhance Public Safety and Security
STRATEGY: 1 Traffic Safety

Service Categories:

Service: 11 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy coordinates the Texas Traffic Safety Program whose primary goal is the statewide reduction in the number and severity of traffic crashes, injuries, and fatalities. Under this program, the agency coordinates traffic safety efforts through the planning, implementation, and evaluation of the Highway Safety Plan (HSP) which provides state and federal traffic safety grant funding. The program consists of education, enforcement, and evaluation efforts conducted in a partnership among federal, state, county, local jurisdictions, and non-profit organizations. The agency is directed by federal law (23 U.S.C. 402.), state statutes (Transportation Code, Chapter 723), and by order of the Governor to coordinate the State and Community Highway Safety Program.

The strategy also covers the department's crash records program. As per state statute (Transportation Code, Sec. 550.062), the agency is required to collect and maintain reports of motor vehicle traffic crashes as submitted by law enforcement agencies across the state. The department currently maintains approximately 3 million crash reports in its files covering a 5 year period. These reports are used to analyze transportation safety and enforcement issues on both the state and local levels.

This strategy maintains appropriation authority to carry forward U.B. from the first year of a biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Chapter 550, Subchapter D and Chapter 723)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Due to the high demand for traffic safety projects, a successful state traffic safety program is dependent upon interagency cooperation among state, federal, and local officials as well as a close partnership with the private sector. Dedicated GR, dedicated federal and matching state funds allow for these types of traffic safety projects. New federal appropriations and the federal surface transportation reauthorization will determine funding opportunities.

FULL TIME EQUIVALENT POSITIONS:		92.9	96.9	105.0	105.0	105.0

STRATEGY DESCRIPTION AND JUSTIFICATION:

The functions of this strategy are to operate the state's 12 travel information centers; to compile, publish, and distribute informational materials about scenic, historic, and recreational places for marketing the highways of the state and attracting traffic; to publish the Texas Highways Magazine monthly and to administer the department's litter prevention and clean air programs. This strategy holds the primary responsibility for DriveTexas, which delivers real-time highway conditions to the traveling public. Members of the public can access the information via TxDOT's website at www.DriveTexas.org, which has both an interactive map displaying current conditions and a drop-down text lookup by roadway, county and/or condition. In addition, there is an Interactive Voice Response (IVR) system available through TxDOT's toll-free Travel Information Line at 1-800-452-9292. Automated highway conditions information is available 24/7 and is updated continuously.

This strategy supports and expands the state's tourism industry and provides services to transportation users. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The economy is an external factor affecting tourism, since leisure travel is usually paid for with disposable income. With the Texas Department of Transportation's (TxDOT) responsibility to provide Texas travel/tourism literature, TxDOT must remain flexible and respond to actions (such as tourism advertising) by the Office of the Governor Economic Development and Tourism Division (EDT) that could impact demand for TxDOT printed materials or visitation at the Texas Travel Information Centers. Title 43, Chapter 23 of the Texas Administrative Code provides for the distribution of state-produced travel literature to local government entities involved in tourism. In order to stimulate travel within Texas, TxDOT enters into agreements with city information centers for assistance in distribution of the department's travel information. This results in greater demand for TxDOT printed travel materials. Some literature production costs have been mitigated from the acceptance of paid advertising. Texas Highways' external factors are driven by customers in the marketplace who voluntarily pay for the magazine and ancillary products. Providing such market-driven value to customers requires good customer service, quality products at fair prices, and adaptation to changing media consumption habits of the population. External factors that influence the growth of magazine and product sales include competition with other publications and with other leisure activities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The purpose of this strategy is to fund and participate with state-supported colleges, universities, and others in research and development programs that can improve transportation operations. Other functions of this strategy include coordination of research implementation, dispersal of research information and management of the product evaluation program. Also, coordination of federal pooled-funded research, Texas' involvement in the National Cooperative Highway Research Program, and 100 percent federally funded research projects fall under this strategy. Strategy expenditures support the Texas Transportation Commission goals to: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The function of this strategy is to promote, protect, and develop aeronautics by providing state and federal financial and technical assistance to Texas communities for airport development, and to act as an agent in applying for, receiving, and disbursing federal funds for general aviation, reliever and non-primary commercial service airports. Another function of this strategy is the operation and maintenance of the state's fleet of aircraft. This strategy directly contributes to the statewide goal to build a solid foundation for social and economic prosperity by developing, maintaining, and enhancing a sound and viable air transportation system to allow and encourage the economic development of the communities the airports serve. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees. This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) between and across biennium. This U.B. authority is requested to continue.

(Transportation Code, Chapter 21, and Sections 22.018 and 22.055; Government Code, Chapter 2205)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The general aviation needs of the state continue to evolve and grow as technology advancements for aircraft and air navigation change. Federal funding from user fees for airport development are directed primarily to commercial service airports and within recent years, Texas' share of federal apportionment funds has declined, thus leaving fewer dollars for the smaller general aviation airports. Furthermore, there are many airports that are ineligible for federal funding. The Federal Aviation Administration's current direction is to place critical emphasis on commercial service capacity enhancement, leaving fewer resources available for general aviation system development.

------	-------------	----------	----------	----------	---------	---------

This strategy administers the state's responsibility as nonfederal sponsor of the main channel of the Gulf Intracoastal Waterway (GIWW) from the Sabine River to the Brownsville Ship Channel. In this role, TxDOT provides for shallow draft navigation of the state's coastal waters in an environmentally sound manner, and supports marine transportation and systems.

TxDOT provides assistance for studies to determine sites and methods for disposal of dredged material along the GIWW, and provides funds to acquire such sites. As required by state law, a biennial report on all activity associated with the GIWW is prepared. The Gulf Intracoastal Waterway Advisory Committee (GIWAC) advises and assists TxDOT on the identification of environmentally sensitive and operationally suitable dredged material placement sites and methods. TxDOT researches activities related to the needs of the GIWW and provides technical input concerning state programs, such as the Texas Coastal Management Program. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of a biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Chapter 51)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors are federal or state legislation which change state participation or state maintenance of a project, strategies of other agencies, and litigation from groups opposing disposal methods, litigation for condemnation awards, the future of the real estate market, and compliance with state and federal regulations in these environmentally sensitive coastal areas. Internal factors are the accomplishment of the acquisition process.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports the management and plan development necessary to provide the systematic preservation and expansion of the rail transportation system. It also supports the associated governmental involvement between other various modes of transportation and rail, and costs related to Metropolitan Planning Organizations (MPOs) and other political subdivisions to conduct rail planning and to coordinate the development of a multimodal transportation plan. This strategy also includes studies related to rail routes and locations, environmental impact, freight rail traffic, passenger rail ridership, and revenue for rail projects and facilities.

This strategy includes rail inventory surveys; freight rail traffic and passenger rail volume counts; rail coding and mapping; and design, inspection and testing of materials for, rail construction projects. Strategy expenditures support the Texas Transportation Commission goals: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

------	-------------	----------	----------	----------	---------	---------

Internal and external factors, such as the age of the rail system, increased usage, weight of trains, external maintenance investments and weather have the largest impact on the condition of the rail system. Additional resources to accomplish this strategy would result in a decreased rate of deterioration of the system, decreased rehabilitation and reconstruction needs in the future, and increased capacity for freight and passenger train movements. A lack of resources would result in an increased rate of deterioration of the rail system, resulting in rail freight and passengers being diverted to the highway system, increasing congestion and highway maintenance costs. In addition, a lack of sufficient resources may have a negative effect on rail safety.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy supports the management and plan development necessary to provide the systematic preservation and expansion of the rail transportation system. It addresses professional services work accomplished through the use of external contracts. This strategy allows for preliminary design, construction and environmental engineering; architectural design; and surveying and mapping. These services are required to perform studies related to rail routes and locations, environmental impacts, freight rail traffic, passenger rail ridership, and revenue for rail projects and facilities.

The expenditures in this strategy support the following goals of the Texas Transportation Commission : Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees. This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

Efficient cooperative communication between the state and private sector must exist to cost effectively implement this strategy. Communications are continually reviewed to enhance delivery of construction projects at the lowest reasonable costs. External factors impacting this strategy include federal legislation, private sector railroad ownership and operations, ability to obtain the necessary rights-of-way, utility adjustments, weather conditions, environmental issues, plan development timing/funding activities, and public hearings.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Rail Safety Program assists the Federal Railroad Administration (FRA) in its railroad safety enforcement efforts by providing additional personnel to conduct investigative and surveillance inspections. The national railroad safety program is carried out through inspections, accident investigations, formal and informal educational efforts, complaint investigations, safety assessments, special inquiries, regulatory development, and research. State and federal inspections determine the extent of compliance by railroads, shippers, and manufacturers with railroad operating rules, and applicable state and federal rules and regulations. Strategy expenditures support the Texas Transportation Commission goals: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Chapter 111)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

601 Department of Transportation

GOAL: 4 Enhance Rail Transportation
OBJECTIVE: 1 Enhance Rail Transportation Service Categories:
STRATEGY: 4 Ensure Rail Safety through Inspection and Public Education Service: 17 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

Under TAC Title 43, Part 1, Chapter 7, Subchapter D, Part 7.41 Rail Safety Program Fee, railroads operating in Texas pay an annual fee to cover 100 percent of the state rail inspection program.

Internal factors and external factors, such as the age of the rail system, increased usage, weight of trains, external maintenance investments and weather have the largest impact on the condition of the rail system. Additional resources to accomplish this strategy would result in a decreased rate of deterioration of the system, decreased rehabilitation and reconstruction needs in the future, and increased capacity for freight and passenger train movements. A lack of resources would result in an increased rate of deterioration of the rail system. This would result in rail freight and passengers being diverted to the highway system, increasing congestion and highway maintenance costs. In addition, a lack of sufficient resources may have a negative effect on rail safety.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy includes expenditures related to the Transportation Commission; TxDOT Administration and staff; finance; planning and policy development; government and public affairs; human resources, and general counsel. Indirect administrative and support costs and FTEs are allocated proportionately among all strategies on the basis of FTEs. Therefore, the following percentage ranges apply to each strategy:

01-01-01 Plan/Design/Manage (38.27% - 38.86%)

02-01-02 Routine Maintenance (56.52% - 56.09%)

02-01-04 Ferry System (2.02% - 1.87%)

03-01-01 Public Transportation (0.44% - 0.43%)

03-02-01 Traffic Safety (0.85% - 0.82%)

03-03-01 Travel Information (0.87% - 0.90%)

03-04-01 Research (0.12% - 0.13%)

03-05-01 Aviation (0.58% - 0.56%)

03-06-01 Gulf Waterway (0.02% - 0.02%)

04-01-01 Rail Plan/Design/Manage (0.18% - 0.20%)

04-01-04 Rail Safety (0.12% - 0.13%)

This method was selected because the employees of this agency benefit most from the products or services funded by the indirect administrative and support strategies. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

TxDOT IT is focused on modernizing the IT infrastructure and applications to become a “Best-in-Class” organization. The IT organization continually strives to attract, retain, and train top-talent to help reach objectives. TxDOT IT has also partnered with IT service providers to improve operational efficiency and support modernization efforts. The agency relies on technology to bring cost-effective solutions to provide appropriate tools and services to stakeholders while reducing risk.

TxDOT's approach to standardizing and modernizing applications is to leverage software-as-a-service and commercial offerings where available. Standardization and modernization of the IT infrastructure, through ongoing replacement, and upgrades where necessary, will reduce cost and risk over the long-term. IT customer and internal support processes will be standardized and aligned to industry best practices.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

In 2007, the voters of the State of Texas approved an amendment to the Texas Constitution authorizing the Texas Transportation Commission to issue general obligation bonds for highway improvement projects. The State of Texas Highway Improvement General Obligation Bonds ("HIGO bonds") (also referred to as Proposition 12 bonds) authorized by Article III, Section 49-p of the Texas Constitution and Transportation Code 222.004 are secured solely by the general revenue of the State of Texas. HIGO bonds may have a maximum maturity of 30 years and may be issued in an aggregate principal amount of up to \$5 billion pursuant to current authority.

This strategy provides for the payment of debt service for HIGO bonds payable from the general revenue of the state. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Section 222.004; Texas Constitution, Article 3, Section 49-p)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

601 Department of Transportation

GOAL: 6 Debt Service Payments for Bonds, Notes, and Other Credit Agreements

OBJECTIVE: 1 Debt Service Payments for Bonds, Notes, and Other Credit Agreements Service Categories:

STRATEGY: 1 General Obligation Bond Debt Service Payments Service: 11 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

External factors impacting debt service requirements include interest rate fluctuations for variable rate debt (if utilized), general market volatility, tax law changes, changes in the State's credit rating, debt amortization and factors impacting project progression which affects the rate at which bond proceeds are spent and replenished. Also, the continuation of the federal subsidy payments related to the Build America Bond ("BAB") program is an important component of reducing debt service cost on the Series 2010A HIGO bond debt issued under the BAB program. As a result of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended by the Bipartisan Budget Act of 2013, BAB subsidy payments have been reduced in fiscal years 2013 and 2014 and are expected to be reduced in 2015. It is unknown if BAB subsidy payments will be reduced in fiscal years 2016 and 2017. To the extent federal BAB subsidy payments are reduced, additional general revenues will be needed to pay debt service for the Series 2010A bonds.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

In 2003, the voters of the State of Texas approved an amendment to the Texas Constitution authorizing the Texas Transportation Commission to issue bonds and other public securities to fund highway improvement projects. The State Highway Fund First Tier Revenue Bonds (“SHF bonds”) (also referred to as Proposition 14 bonds) authorized by Article III, Section 49-n of the Texas Constitution and Section 222.003, Texas Transportation Code are secured by a pledge of and are payable from revenues deposited to the State Highway Fund. Under current statutory authority, \$6 billion is authorized for highway improvement projects; however of that amount \$1.2 billion must be used for safety projects. SHF bonds may have a maximum maturity of 20 years.

This strategy provides for the payment of debt service for SHF bonds payable from certain revenues deposited to the credit of the State Highway Fund including state motor fuels tax, tax on motor lubricants and motor vehicle registration fees. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Section 222.003; Texas Constitution, Article 3, Section 49-n)

601 Department of Transportation

GOAL: 6 Debt Service Payments for Bonds, Notes, and Other Credit Agreements

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

In 2001, with voter approval the Texas Legislature established the Texas Mobility Fund to provide a method of financing for the construction , reconstruction, acquisition, and expansion of state highways, and to provide public participation in publicly owned toll roads and other public transportation projects. The State of Texas General Obligation Mobility Fund Bonds (“TMF bonds”), authorized by Article III, Section 49-k of the Texas Constitution and Subchapter M of Chapter 201, Texas Transportation Code, are secured by revenues deposited into the Texas Mobility Fund and, at the option of the Texas Transportation Commission, the general revenues of the State of Texas. TMF bonds may have a maturity of no longer than 30 years and bonding capacity is constrained by statutory debt service coverage requirements as certified by the Comptroller.

This strategy provides debt service for the repayment of TMF bonds payable from dedicated revenues of the Texas Mobility Fund including motor vehicle inspection fees , driver record information fees, driver license fees, certificate of title fees and other miscellaneous revenues. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Section 201, Subchapter M; Texas Constitution, Article 3, Section 49-k)

601 Department of Transportation

GOAL: 6 Debt Service Payments for Bonds, Notes, and Other Credit Agreements
OBJECTIVE: 1 Debt Service Payments for Bonds, Notes, and Other Credit Agreements Service Categories:
STRATEGY: 3 Texas Mobility Fund Bond Debt Service Payments Service: 11 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors impacting debt service requirements include interest rate fluctuations on variable rate debt, changes to the credit ratings of liquidity providers, general market volatility, tax law changes, changes in the credit ratings of TMF bonds, debt amortization and factors impacting project progression which affects the rate at which bond proceeds are spent and replenished. Also, the continuation of the federal subsidy payments related to the Build America Bond ("BAB") program is an important component of reducing debt service cost on the Series 2009A TMF bonds issued under the BAB program. As a result of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended by the Bipartisan Budget Act of 2013, BAB subsidy payments have been reduced in fiscal years 2013 and 2014 and are expected to be reduced in 2015. It is unknown if BAB subsidy payments will be reduced in fiscal years 2016 and 2017. To the extent federal BAB subsidy payments are reduced, additional Texas Mobility Fund revenues will be needed to pay debt service on Series 2009A bonds. Additionally, the vibrancy of the dedicated revenues deposited into the Texas Mobility Fund is somewhat correlated to general economic activity of the state. To the extent Texas Mobility Fund revenues are insufficient to pay debt service on TMF bonds, the general revenues of the state are pledged to the repayment of the bonds.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

Other Debt Service includes debt service on short-term obligations issued pursuant to and as authorized by Article III, Section 49-m of the Texas Constitution and Section 201.115, Texas Transportation Code. The Texas Transportation Commission has entered into agreements for short-term lending facilities to facilitate efficient cash management operations in response to fluctuations in the cash balance of the State Highway Fund that result from the cyclical nature and uncertain timing of deposits into and payments out of the State Highway Fund. Such obligations are payable only from funds appropriated by the state legislature, including State Highway Fund revenues, and must mature within two years of issuance. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Section 201.115; Texas Constitution, Article 3, Section 49-m)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors impacting debt service requirements include interest rate fluctuations on borrowings, changes to the credit ratings of debt secured by the State Highway Fund, changes in the cost of the lending facilities, general market volatility, and tax law changes. Additionally, factors impacting the timing of federal reimbursements have a large impact on the strategy. Delayed or reduced federal reimbursements may cause additional use of the cash management program and resulting additional interest cost from borrowing. Lastly, factors impacting project progression and the potential for a mismatch in the timing of revenue deposits impact the strategy.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy supports the management and plan development necessary to provide the systematic preservation and expansion of the transportation system by using regional toll revenue and concession fees. It also supports the associated governmental involvement between various modes of travel, and costs related to Metropolitan Planning Organizations (MPOs) and other political subdivisions to conduct transportation planning and to coordinate the development of a multimodal transportation plan. This strategy also supports route and location studies, environmental impact studies, traffic and revenue studies, as well as, design, construct, operate, maintain and expand projects.

This strategy includes road inventory surveys, traffic volume counts, coding and mapping, and design and inspection of, as well as testing of materials for, construction projects. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code Sections 201.102, 201.103, 203.002, and 203.021)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Cost-effective solutions to transportation problems involve numerous state and federal requirements, procedures, and processes before construction starts. This strategy involves scheduling construction with contractors which widens the functional responsibility of TxDOT with MPOs and other entities under state and federal legislation. It then becomes difficult to maintain consistent work levels necessary to implement the development of an economically maintained transportation system. TxDOT cooperates with construction industry partners, as well as provides timely project solutions to the state's urban and rural communities.

This strategy supports professional service work accomplished through the use of outside sector contracts by utilizing regional toll revenue and concession fees. It provides funding for preliminary project design, construction and environmental engineering, architectural design, and surveying and mapping. Also incorporated in this strategy are route and location studies, environmental impact studies, traffic and revenue studies, speed zone studies and feasibility studies. The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Section 223.041 and 223.201D)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Cost-effective solutions to transportation problems involve numerous state and federal requirements, procedures, and processes before construction starts. This strategy involves procuring services of external consultants, which increases the functional responsibility of TxDOT. TxDOT cooperates with external partners to provide timely transportation solutions to the state's urban and rural communities.

This strategy is to acquire right-of-way through purchase or condemnation for transportation by using regional toll revenue. The strategy also includes the eligible costs of adjusting utility facilities directly impacted by transportation construction projects and the payments and expenses incurred under the relocation assistance program for displaced residents and businesses. Cities and counties are authorized to acquire right-of-way on behalf of the state and are eligible to be reimbursed not less than 90 percent of their acquisition costs.

This strategy also includes all contracted cost directly related to the acquisition of right of way. This strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first year of the biennium to the second year. This U.B. authority is requested to continue in the next biennium.

The expenditures in this strategy support the following goals of the Texas Transportation Commission: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

(Transportation Code, Sections 91.091, Chapter 203, Subchapter D and E, and Sections 224.005 and 224.008)

------	-------------	----------	----------	----------	---------	---------

The cost of purchasing needed right of way is directly related to the location of the proposed transportation projects. Commercial properties or properties improved with buildings and other improvements are generally the more expensive properties to acquire. Owners are entitled to receive just compensation; however, when owners reject the agency's offer for negotiated purchase and eminent domain proceedings are necessary, the amount paid for right-of-way may be significantly increased because of awards made by special commissioners and juries. Relocation assistance benefits must be paid to the owners and occupants of property who are displaced by the highway project. In most situations, the cost of acquiring or relocating utilities located on the new right-of-way must be paid to the owners of the utilities. Standard operating procedures and automated systems have been implemented, increasing the efficiency of right-of-way acquisition operations. Emphasis is given to settlement of condemnation cases to expedite possession and minimize increased costs.

Donation of right-of-way by landowners is encouraged to realize reductions to right-of-way costs.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

This strategy pays for construction contracts for roads, bridges and other transportation facilities construction on the state transportation system using regional toll revenues and concession fees. TxDOT contracts with outside firms for construction, and the strategy represents actual construction work disbursements. Payments for work done in this strategy are progressive, meaning they are processed/made as the work is completed and can continue for many years after the project began. This strategy has no direct personnel costs. Strategy expenditures support the Texas Transportation Commission goals to: Deliver the Right Projects, Focus on the Customer, Foster Stewardship, Optimize System Performance, Preserve our Assets, Promote Safety, and Value our Employees.

The strategy maintains appropriation authority to carry forward unexpended balances (U.B.) from the first to the second year of the biennium. This U.B. authority is requested to continue in the next biennium.

(Transportation Code, Sections 201.002, 201.102, 201.103, 203.002, 203.003, 203.021, Chapter 224 Subchapter B and 471.004)

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Efficient, cooperative communication between the state and external must exist to cost-effectively implement this strategy. Communications are continually reviewed to enhance delivery of construction projects at the lowest reasonable costs. External factors impacting this strategy include state and federal legislation, ability to obtain the necessary right-of-way, utility adjustments, weather conditions, environmental issues, plan development timing/funding activities, and public hearings.

3	VII 20-21	<p>3. Transfer Authority.</p> <p>a. <u>Appropriations may be transferred up to 5% of the appropriation item from which the transfer is made for the fiscal year among Strategies A.1.2, Contracted Planning and Design, A.1.3, Right-of-Way Acquisition, A.1.4 Construction Contracts, A.1.5 Maintenance Contracts, and A.1.8 Construction Grants & Services.</u> Subject to the prior written approval of the Legislative Budget Board, appropriations may be transferred in any amount among Strategies A.1.2, Contracted Planning and Design, A.1.3, Right-of-Way Acquisition, A.1.4 Construction Contracts, A.1.5 Maintenance Contracts, and A.1.8 Construction Grants & Services. No appropriations may be transferred out of any strategy identified in this subsection to any strategy not identified in this subsection without prior authorization from the Legislative Budget Board.</p> <p>b. Subject to the appropriation transfer provisions in Article IX, §14.01, of this Act, appropriations may be transferred out of any strategy not identified in subsection (a) of this rider into any strategy identified in subsection (a).</p> <p>c. The Department of Transportation may submit to the Legislative Budget Board a request to exceed the appropriation transfer limitations specified by this rider, in a format prescribed by the Legislative Budget Board, that provides information regarding the purposes and the projected impact of the transfers on transportation projects and future appropriation needs. A request submitted under this provision shall be considered to be approved unless the Legislative Budget Board issues a written disapproval within 30 business days after the date on which the staff of the Legislative Budget Board concludes its review of the request to transfer appropriations and forwards its review to the Chair of the House Appropriations Committee, Chair of the Senate Finance Committee, Speaker of the House, and Lieutenant Governor. Additional information requested by the Legislative Budget Board regarding a request submitted by the Department of Transportation pursuant to this rider shall be provided in a timely manner. Notwithstanding any provision to the contrary in this subsection, the Legislative Budget Board is authorized to suspend the approval of a request at any time pending the receipt of additional information requested of the Department of Transportation.</p> <p><i>This rider has been revised to allow the Department the flexibility to transfer funds among the major project delivery contracting strategies as priorities of local partners and demands shift.</i></p>										

3.B. Rider Revisions and Additions Request (continued)

4	VII 21	<p>4. Magazine Appropriations. The Department of Transportation is directed to set subscription rates and other charges for Texas Highways Magazine at a level that will generate receipts approximately sufficient to cover the costs incurred in the production and distribution of the magazine. In addition to funds appropriated above, the department is hereby appropriated to Strategy C.3.1, Travel Information, any magazine revenues generated above \$4,700,000 <u>\$4,300,000</u> for the 2018-2020 fiscal year and \$4,900,000 <u>\$4,300,000</u> for the 2019-2021 fiscal year. Funds may be utilized only for the purpose of magazine costs. The Department of Transportation may transfer revenues available from prior year's subscription fees to Strategy C.3.1, Travel Information, in the event of unforeseen or unusual expenditures associated with the production costs of the Texas Highways Magazine. The Department of Transportation is hereby appropriated all revenue collected from the sale of promotional items as authorized by Transportation Code §204.009.</p> <p><i>This rider has been revised to update the biennial references and amounts.</i></p>
8	VII 21	<p>8. Aviation Services Appropriations. In addition to amounts appropriated above, any unexpended and unobligated balances of appropriations made to the Department of Transportation from State Highway Fund No. 006 for airport development grants in the 2016-17 <u>2018-19</u> biennium in Strategy B.1.4 <u>C.5.1</u>, Aviation Services, remaining as of August 31, 2017-2019 (estimated to be \$0), are appropriated to Strategy C.5.1, Aviation Services, for the fiscal biennium beginning September 1, 2017-2019, for the same purpose.</p> <p><i>This rider has been revised to reflect the new budget structure, biennial references and amounts.</i></p>
12	VII 22	<p>14. Reporting Requirements.</p> <p>a. Trade Transportation Activities. The Department of Transportation shall provide a report to the department's border district legislators and to the respective metropolitan planning organizations on the department's trade transportation activities in such border districts during the 2018-19 <u>2020-21</u> biennium. The department shall report annually no later than January 1, each year of the biennium. The report shall also be provided to the Governor and the Legislative Budget Board.</p> <p>b. Cash Forecast. In addition to other information that might be requested by the Legislative Budget Board, the Department of Transportation shall submit to the Legislative Budget Board, in the format prescribed by the Legislative Budget Board, a monthly cash forecast report to the Legislative Budget Board and the Governor on state and federal funds received in State Highway Fund No. 006 as specified by the Legislative Budget Board. At any time, if the department becomes aware of any variances to estimated amounts appropriated above out of state and federal funds received in State Highway Fund No. 006, the department shall immediately notify the Legislative Budget Board and the Governor in writing specifying the affected funds and the reason for the anticipated change. The monthly cash forecast report shall include detailed explanations of the causes and effects of current and anticipated fluctuations in the cash balance.</p> <p>c. Project Status Report. The Department of Transportation shall provide to each member of the House and Senate, unless a member requests it not be provided, a status report on all highway construction projects, airport projects, rail projects, toll road projects, turnpike projects, toll authorities, and regional</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>mobility authorities, and toll road conversion projects by legislative district, currently under contract or awaiting funding. The report shall include projects that would be funded fully or in part by state, federal, or toll funds. The report shall be filed prior to January 1, each fiscal year. In addition, 30 90 days prior to any loan being granted approved by the department Commission for any project, all members of the district within which the project is located shall be notified on the status of the project and how other projects in any district would be affected.</p> <p>d. Toll Project, Rail Project, and Toll Project Entities. The Department of Transportation shall provide, unless a member requests it not be provided, notification of:</p> <ul style="list-style-type: none"> (1) all rail projects, toll road projects, and turnpike projects included in the draft Unified Transportation Program located within each member of the House and Senate's district no later than 10 days after being identified and at least 2 business days prior to public release of the draft Unified Transportation Program; (2) the receipt of an application requesting approval to create a regional mobility authority or regional tollway authority located within each member of the House and Senate's district no later than 10 days after receipt of an application and of the Transportation Commission's consideration of an application no later than 10 days prior to commission action; (3) any toll authority or regional mobility authority board member who discloses to the department that the board member owns or participates in any holding included in a proposed project immediately after the department receives that information; and (4) the receipt of written notification for a proposed passenger rail or toll road project within each member of the House and Senate's district, whether or not it involves any state or federal funding no later than 10 days after receipt. <p>e. Public Transportation Activities. The Department of Transportation shall develop and submit an annual report to the Legislature no later than January 4 March 15, each fiscal year on public transportation activities <u>during the previous fiscal year</u> in Texas. The report shall at a minimum include monthly data on industry utilized standards which best reflect: ridership, mileage, revenue by source, and service effectiveness, such as passengers per revenue mile. In order to meet the mandates of Chapter 461, Transportation Code, relating to the coordination of public transportation and to implement the legislative intent of §461.001, Transportation Code, the Department of Transportation is directed to engage the services of the Texas A&M Transportation Institute, or any entity that the Department of Transportation deems appropriate, to maintain an inventory of all public transportation providers in the state to determine the types and levels of services being provided by each of them and the extent to which those providers can assist the state in meeting the mandates of the statute.</p> <p>f. State Transportation Improvement Program. For each fiscal year in the biennium, the Department of Transportation shall provide a report, with results statewide by district, on the percentage of projects listed individually or by reference in the State Transportation Improvement Program (STIP) that were let on or before the letting date provided in the STIP.</p>
--	--	---

3.B. Rider Revisions and Additions Request (continued)

		<p>g. Electronic Format. All reports to the Legislature outlined in this Rider and elsewhere in this Act relating to Toll Road Projects must be delivered to the Legislature in electronic formats and, if requested, in paper format.</p> <p>h. Federal Funds Reporting Requirement.</p> <p>(1) The Department of Transportation shall provide to the Legislative Budget Board and the Governor:</p> <p>(A) written notification of any increases or decreases in the amounts of federal funds estimated to be available to the Department of Transportation for the 2018-19 <u>2020-21</u> biennium within 10 business days of the date upon which the Department of Transportation is notified of such increases or decreases; and</p> <p>(B) written notification outlining:</p> <p>i. the use and projected impacts of any additional federal funds available to the Department of Transportation above amounts estimated for the 2018-19 <u>2020-21</u> biennium; and/or</p> <p>ii. the Department of Transportation's plan for addressing any reductions in federal funds, including federally-mandated funding rescissions.</p> <p>(2) The Department of Transportation shall provide to the Legislative Budget Board and the Governor any documentation required by the U.S. Department of Transportation, Federal Highway Administration regarding the Department of Transportation's proposed use of additional federal funds and/or proposed actions to address federal funds reductions, including federally-mandated funding rescissions, as soon as possible prior to submitting the required documentation to the U.S. Department of Transportation, Federal Highway Administration.</p> <p>i. Toll Project Revenue and Funds Report. Using funds appropriated above, the Department of Transportation shall submit to the Legislative Budget Board, in the format prescribed by the Legislative Budget Board, an annual report of all state toll project revenues received and any other related funds that are deposited outside of the state treasury, including the purpose and use of such funds by the department. The report shall be submitted no later than November 1, in each year of the biennium.</p> <p>j. Appropriations from State Highway Fund No. 006 and Proposition 12 General Obligation Bonds. Prior to the beginning of each fiscal year, the department shall provide the Legislative Budget Board and the Governor with a detailed plan for the use of appropriations from State Highway Fund No. 006 and Proposition 12 General Obligation Bond Proceeds which includes, but is not limited to:</p> <p>(1) each construction project's enhancement of the state's economy, traffic safety, and connectivity;</p> <p>(2) a detailed account of the level of traffic congestion reduced by each proposed project, in districts that contain one of the 50 most congested roads; and</p> <p>(3) a district by district analysis of pavement score targets and how proposed maintenance spending will impact pavement scores in each district.</p>
--	--	--

3.B. Rider Revisions and Additions Request (continued)

		<p>k. Congested Road Segments. Out of funds appropriated above, the department shall expend necessary funds to prominently post, no later than November 1, the top 100 congested road segments on its website and:</p> <ul style="list-style-type: none">(1) the annual hours of travel delays and the economic value of the delays for each segment;(2) a congestion mitigation plan drafted in coordination with the local Metropolitan Planning Organization which shall include, when appropriate, alternatives to highway construction; and(3) at least a quarterly update of the current status in completing the mitigation plan for each road segment. <p>l. Pass-through Tolling Agreements. The Department of Transportation shall submit an annual report to the Legislative Budget Board no later than November 1 of each fiscal year, in the format prescribed by the Legislative Budget Board, providing information on all existing pass-through tolling or pass-through financing agreements of the department.</p> <p><i>This rider has been revised to reflect a change in the scope of reporting. A portion of this rider has been marked for deletion, a reporting deadline has been adjusted, and the biennial references have been updated.</i></p>
--	--	---

3.B. Rider Revisions and Additions Request (continued)

18	VII 26-27	<p>18. Additional Funds.</p> <p>a. — Except during an emergency as defined by the Governor, no appropriation of additional State Highway Funds above the estimated appropriation amounts identified above in the Method of Financing for the Department of Transportation as State Highway Fund No. 006, State Highway Fund No. 006 – Toll Revenue, State Highway Fund No. 006 – Concession Fees, State Highway Fund No. 006 – Proposition 1, 2014, or State Highway Fund No. 006 – Proposition 7, 2015 may be expended by the Department of Transportation unless:</p> <p style="padding-left: 40px;">(1) — the Department of Transportation submits a report to the Legislative Budget Board and the Governor outlining any additional funds available above amounts estimated for the 2018-19 <u>2020-21</u> biennium, their anticipated uses and projected impacts; and,</p> <p style="padding-left: 40px;">(2) — the Legislative Budget Board and the Governor issue a written approval or specify an alternate use for the additional funds.</p> <p>b. — A request to expend additional funds pursuant to subsection (a) shall be considered to be approved unless the Legislative Budget Board issues a written disapproval within 30 business days after the date on which the staff of the Legislative Budget Board concludes its review of the request and forwards the review to the Chair of the House Appropriations Committee, Chair of the Senate Finance Committee, Speaker of the House, and Lieutenant Governor. Additional information requested by the Legislative Budget Board regarding a request submitted by the Department of Transportation pursuant to this rider shall be provided in a timely manner. Notwithstanding any provision to the contrary in this subsection, the Legislative Budget Board is authorized to suspend the approval of a request at any time pending the receipt of additional information requested of the Department of Transportation.</p> <p>c. — The limitation in subsection (a) of this rider does not apply to the expenditure of funds received from governmental entities for purposes of reimbursing State Highway Fund No. 006 for expenses incurred with transportation projects or the expenditure of funds received as reimbursements for authorized services that are otherwise appropriated by §8.02, Article IX, of this Act.</p> <p><i>This rider is recommended for deletion to utilize Article IX, Section 6.02 to maximize the use of balances of the State Highway Fund.</i></p>
----	-----------	--

3.B. Rider Revisions and Additions Request (continued)

20	VII 27	<p>20. Appropriations Limited to Revenue Collections: Rail Safety. Fees, fines, and other miscellaneous revenues as authorized and generated by the operation of the Rail Safety program pursuant to §111.101, Transportation Code, shall cover, at a minimum, the cost of appropriations made above in Strategy D.1.4, Rail Safety, as well as the "other direct and indirect costs" made elsewhere in this Act associated with this program. Direct costs for the Rail Safety program are estimated to be \$1,208,059 in fiscal year 2018 <u>2020</u> and \$1,208,059 in fiscal year 2019 <u>2021</u> and "other direct and indirect costs" are estimated to be \$405,754 for fiscal year 2018 <u>2020</u> and \$406,789 for fiscal year 2019 <u>2021</u>.</p> <p>In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct that the Comptroller of Public Accounts reduce the appropriation authority provided above to be within the amount of revenue expected to be available.</p> <p><i>This rider has been revised to update the biennial references.</i></p>
22	VII 27-28	<p>22. Comprehensive Development Agreements.</p> <p>a. — The Department of Transportation may not expend any funds appropriated by this Act to enter into a comprehensive development agreement, unless the department submits a report to the Legislative Budget Board, in the format prescribed by the Legislative Budget Board, that provides information regarding the location, project costs, and projected benefits to the state for each project proposed under a comprehensive development agreement; and the Legislative Budget Board issues a written approval.</p> <p>b. — A request submitted by the Department of Transportation pursuant to subsection (a) shall be considered to be approved unless the Legislative Budget Board issues a written disapproval within 30 business days after the date the Legislative Budget Board staff concludes its review of the request and forwards the review to the Chair of the House Appropriations Committee, Chair of the Senate Finance Committee, Speaker of the House, and Lieutenant Governor.</p> <p>c. — Additional information requested by the Legislative Budget Board regarding a request submitted by the Department of Transportation pursuant to subsection (a) shall be provided in a timely manner. Notwithstanding subsection (b), the Legislative Budget Board is authorized to suspend the approval of a request at any time pending the receipt of additional information requested of the Department of Transportation.</p> <p><i>This rider is recommended for deletion as the Transportation Code Sec. 371.051 provides the process for CDA approval.</i></p>

3.B. Rider Revisions and Additions Request (continued)

23	VII 28	<p>23. Colonia Projects. In addition to amounts appropriated above, any unexpended balances in Strategy A.1.8, Construction Grants & Services, from General Obligation Bond Proceeds for colonia access roadway projects remaining as of August 31, 2017<u>2019</u>, (estimated to be \$0) are hereby appropriated to the Department of Transportation for the fiscal year beginning September 1, 2017<u>2019</u>, for the same purpose. Any unexpended balances of these funds remaining as of August 31, 2018<u>2020</u>, are hereby appropriated to the Department of Transportation for the fiscal year beginning September 1, 2018<u>2020</u>, for the same purpose.</p> <p><i>This rider has been revised to update the biennial references.</i></p>
25	VII 28	<p>25. Crash Records Information System. Included in the amounts appropriated above in Strategy C.2.1, Traffic Safety, is \$730,218 in fiscal year 2018<u>2020</u> and \$730,218 in fiscal year 2019<u>2021</u> from General Revenue - Insurance Companies Maintenance Tax and Insurance Department Fees for ongoing maintenance of the Crash Records Information System.</p> <p><i>This rider has been revised to update the biennial references.</i></p>
27	VII 28	<p>27. Toll Project Subaccounts. The amounts appropriated above to the Department of Transportation in Goal G, Develop Toll Subaccount Projects, are made from fund balances and interest earnings on fund balances held in toll project subaccounts in the State Highway Fund for the State Highway 121, State Highway 161, and State Highway 130, Segments 5 and 6, toll projects.</p> <p><i>This rider has been revised to remove reference to specific projects as project subaccounts may be established for additional projects.</i></p>
28	VII 28	<p>28. Appropriations from Proposition 12 General Obligation Bond Proceeds: Unissued Authority and Balances from Prior Fiscal Biennium. In addition to the amounts appropriated above to the Department of Transportation from Proposition 12 General Obligation Bond Proceeds, any remaining General Obligation Bond authorization pursuant to Section 49 p(a), Article III, Texas Constitution, and any unexpended balances of proceeds from the issuance and sale of such general obligation bonds remaining as of August 31, 2017<u>2019</u>, that were appropriated to the Department of Transportation for the 2016-17<u>2018-19</u> biennium are hereby appropriated for the fiscal biennium beginning September 1, 2017<u>2019</u>, for the same purpose. Any remaining General Obligation Bond authorization pursuant to Section 49 p(a), Article III, Texas Constitution, and any unexpended balances of these funds remaining as of August 31, 2018<u>20</u>, are hereby appropriated to the Department of Transportation for the fiscal year beginning September 1, 2018<u>20</u> for the same purpose.</p> <p><i>This rider has been revised to update the biennial references and to remove references to unissued authority for Prop 12 as there is no unissued authority remaining.</i></p>

3.B. Rider Revisions and Additions Request (continued)

29	VII 28-29	<p>29. Unexpended Balance Appropriation: Rail Projects. Any unexpended balances of General Revenue Funds remaining as of August 31, 2017 2019, from General Revenue appropriations made to the Department of Transportation in Strategy E.1.2, Contract Rail Plan/Design, in the 2016-17 biennium for the purposes of environmental review and other preliminary planning activities for the Austin-San Antonio passenger rail project (estimated to be \$0), or Strategy E D.1.3, Rail Construction, in the 2016-17 2018-19 biennium for the purpose of making improvements to and rehabilitating the South Orient Railroad, including any unexpended balances from the appropriation of contractual car load fees paid to the Department of Transportation on the Texas Pacifico rail line, (estimated to be \$0) are hereby appropriated to the Department of Transportation in the respective strategies in the fiscal biennium beginning September 1, 2017 2019, for the same purposes.</p> <p><i>This rider has been revised to expand the UB authority for car load fees, to reflect the new budget structure, and to update the biennial references.</i></p>
32	VII 29	<p>32. Travel Information Centers. Out of funds appropriated above in Strategy C.3.1, Travel Information, the Department of Transportation, with assistance from the Office of the Governor, Division of Economic Development & Tourism, shall develop a methodology to determine the economic and safety impact of travel information centers. The department shall make findings on the economic and safety impact of travel information centers during the 2018-19 biennium, based on this methodology, available on its website no later than November 1, 2018.</p> <p><i>This rider is recommended for deletion as there has been no significant change in the results from the surveys conducted.</i></p>
33	VII 29	<p>33. Unexpended Balances Appropriation: Acquisition of Information Resource Technologies and Centralized Accounting and Payroll/Personnel System (CAPPS). Any unobligated and unexpended balances of funds remaining as of August 31, 2017 2019, that were appropriated to the Department of Transportation for the 2016-17 2018-19 biennium for capital budget items in the Acquisition of Information Resource Technologies capital budget category (estimated to be \$0) <u>and Centralized Accounting and Payroll/Personnel System (CAPPS) (estimated to be \$0)</u> are appropriated for the fiscal biennium beginning September 1, 2017 2019, for the same purpose.</p> <p><i>This rider has been revised to expand the UB authority allowed for Acquisition of Information Resource Technologies to CAPPS and to update the biennial references.</i></p>
34	VII 29	<p>34. Unexpended Balances Appropriation: Construction Grants and Services. Any unexpended balances remaining as of August 31, 2017 2019, from appropriations made to the Department of Transportation in Strategy Strategies A.1.4 Construction Contracts and B.1.3, A.1.8 Construction Grants and Services, in the 2016-17 2018-19 biennium (estimated to be \$0) are appropriated to the Department of Transportation in Strategy A.1.8, Construction Grants & Services, for the fiscal biennium beginning September 1, 2017 2019, for the same purpose.</p> <p><i>This rider has been revised to reflect the new budget structure and to update the biennial references.</i></p>

3.B. Rider Revisions and Additions Request (continued)

35	VII 29	<p>35. Debt Reduction Report. It is the intent of the Legislature that the Texas Transportation Commission and the Department of Transportation look for any and all opportunities for savings that may be accomplished for the department and the state from efforts to refinance, restructure, defease, or refund the outstanding bond indebtedness issued for its transportation programs under terms and conditions that the commission finds to be in the best interest of the state. The department shall report to the Governor, Lieutenant Governor, Speaker of the House, and the Legislature annually on the outcomes of these efforts with the report due on or before August 31 of each fiscal year <u>in which the Commission finds opportunities to refinance its debt.</u></p> <p><i>This rider has been revised to require reporting only when refinancing opportunities are available.</i></p>
37	VII 29	<p>37. Limitation on Capital Budget – Acquisition of Information Resource Technologies. Notwithstanding the general transfer provisions of this Act, the Department of Transportation may not transfer any appropriations into or out of the Mainframe Modernization capital budget item listed under "Acquisition of Information Resource Technologies" in Rider 2, Capital Budget, without the approval of the Legislative Budget Board and the Governor. A request to exceed this limitation must include, at a minimum, a statement justifying the need to exceed the transfer limitation and an explanation as to why such transfer cannot be deferred. The request shall be considered to be approved unless the Legislative Budget Board or the Governor issues a written disapproval within 30 business days after the date on which the staff of the Legislative Budget Board concludes its review of the request to transfer appropriations and forwards its review to the Chair of the House Appropriations Committee, Chair of the Senate Finance Committee, Speaker of the House, and Lieutenant Governor. Any requests for additional information made by the Legislative Budget Board shall suspend the counting of the 30 business days.</p> <p><i>This rider is recommended for deletion to subject these capital items to the same transferability rules as other capital projects.</i></p>
38	VII 30	<p>38. Interagency Contract for Legal Services. Out of funds appropriated above, \$6,185,674 <u>\$6,685,674</u> in each fiscal year of the 2018-19 <u>2020-21</u> biennium is for an interagency contract with the Office of the Attorney General for legal services provided by the Office of the Attorney General to the Department of Transportation. Any interagency contract funded by appropriated funds may not exceed reasonable attorney fees for similar legal services in the private sector, shall not jeopardize the ability of the Department of Transportation to carry out its legislative mandates, and shall not affect the budget for the Department of Transportation such that employees must be terminated in order to pay the amount of the interagency contract.</p> <p><i>This rider has been revised to update the biennial references and amount.</i></p>

3.B. Rider Revisions and Additions Request (continued)

39	VII 30	<p>39. Performance Reporting for the Voluntary Turnback Program. Out of funds appropriated above, the Texas Department of Transportation (TxDOT) shall report on a biennial basis the following information to the Legislative Budget Board and the Office of the Governor no later than December 1, 2018: (1) the number of communities participating in the voluntary road turnback program; (2) a list of roads transferred to local governments; (3) the number of lane miles transferred to local governments; (4) information on the amount of maintenance funds made available associated with the transferred roads; (5) a list of maintenance projects on which the newly available funds are being spent; and (6) a list of the state's most eligible roads with potential for transfer. TxDOT should use this data to evaluate the turnback program and include recommendations to enhance the program in its biennial report.</p> <p><i>This rider is recommended for deletion as reporting is not necessary for this now voluntary process.</i></p>
40	VII 30	<p>40. Appropriation of Rail Receipts from Car Load Fees. In addition to amounts appropriated above, all revenues collected from contractual car load fees paid to the Department of Transportation on the Texas Pacifico rail line (estimated to be \$3,000,000 in each fiscal year) <u>and all unexpended balances of car load fees from prior years (estimated to be \$0)</u> are appropriated to the department in Strategy D.1.3, Rail Construction, for rail construction projects.</p> <p><i>This rider has been revised to allow for UB authority for contractual car load fees.</i></p>
41	VII 30	<p>41. Proposition 1 Appropriations. Amounts appropriated above in Strategy A.1.6, Proposition 1, 2014, from State Highway Fund No. 006 - Proposition 1, 2014, include estimated revenue transfers to the State Highway Fund for the 2018-19 <u>2020-21</u> biennium pursuant to Article III, Section 49- g(c-1) of the Texas Constitution (estimated to be \$563,000,000 <u>\$1,594,248,750</u> in fiscal year 2018 <u>2020</u> and \$739,022,000 <u>\$875,000,000</u> in fiscal year 2019 <u>2021</u>) to be used for constructing, maintaining, and acquiring rights- of-way for non-tolled public roadways, and unexpended balances remaining from prior fiscal years (estimated to be \$722,223,531 <u>\$1,047,166,970</u> in fiscal year 2018 <u>2020</u> and \$485,671,609 <u>\$349,055,657</u> in fiscal year 2019 <u>2021</u>) for ongoing project development costs and construction contract payments on eligible roadway projects initiated prior to the 2018-19 <u>2020-21</u> biennium.</p> <p><i>This rider has been revised to update the biennial references and amounts.</i></p>

3.B. Rider Revisions and Additions Request (continued)

42	VII 30	<p>42. Proposition 7 Appropriations. <u>The Comptroller shall transfer the remainder of the fiscal year 2019 Proposition 7, 2015, amount estimated to be \$1,800,000,000) to the State Highway Fund pursuant to Article VII, Sec. 7-c (a) for the Texas Constitution by September 3, 2019.</u></p> <p>a. Contingent upon the Comptroller transferring the fiscal year 2018 Proposition 7, 2015, amount (estimated to be \$2,205,400,000) to the State Highway Fund pursuant to Article VIII, Sec. 7-c (a) of the Texas Constitution by September 3, 2018, and the Comptroller transferring a portion of the fiscal year 2019 Proposition 7, 2015, amount (estimated to be \$700,000,000) to the State Highway Fund by August 31, 2019, the following amounts are allocated to the strategies above for the following purposes, in accordance with Article VIII, Sec. 7-c, subsection (c), of the Texas Constitution:</p> <p style="padding-left: 40px;">(1) \$2,527,698,000 in fiscal year 2019 in Strategy A.1.7, Proposition 7, 2015, for the construction, maintenance, or acquisition of rights-of-way for public roadways other than toll roads; and</p> <p style="padding-left: 40px;">(2) \$377,702,000 in fiscal year 2019 in Strategy F.1.1, General Obligation Bonds, for the repayment of principal and interest on general obligation bonds issued as authorized by Article III, Sec. 49 p, of the Texas Constitution.</p> <p>b. Pursuant to Texas Constitution, Article VIII, Sec. 7-c (a), the full amount of sales tax proceeds for fiscal year 2018 and an estimated \$700,000,000 for fiscal year 2019 shall be transferred to the State Highway Fund during the biennium. The sales tax proceeds shall be allocated as described in subsection (1) and (2) of this rider. It is the intent of the Legislature that the remaining sales tax proceeds for fiscal year 2019 will transfer to the State Highway Fund in the following year.</p> <p><i>This rider has been revised to allow for the timely transfer of Prop 7 amounts.</i></p>
43	VII 30	<p>43. Sunset Contingency. Funds appropriated above for fiscal year 2019 for the Department of Transportation are made contingent on the continuation of the Department of Transportation by the Eighty-fifth Legislature, Regular Session, 2017. In the event that the agency is not continued, the funds appropriated above for fiscal year 2018, or as much thereof as may be necessary, are to be used to provide for the phase out of the agency operations.</p> <p><i>This rider is recommended for deletion as the Department is not subject to Sunset Review this session.</i></p>

3.B. Rider Revisions and Additions Request (continued)

44	VII 31	<p>44. Capital Budget Authority: Austin Campus Consolidation. Out of amounts appropriated above to the Department of Transportation in Strategy E.1.1, Central Administration, \$30,000,000 in State Highway Funds in fiscal year 2018 shall be used for acquisition of land and other real property, site preparation, architectural services, and other preconstruction development activities in preparation for the construction of buildings and facilities for the consolidation of the agency's Riverside and Camp Hubbard Campuses in Austin. Out of the amounts authorized for capital budget expenditures in Rider 2, Capital Budget, for Austin Campus Consolidation for the 2018-19 biennium, the Department of Transportation is authorized to use appropriations identified in this provision for capital expenditures categorized as "Acquisition of Land and Other Real Property" or "Construction of Buildings and Facilities" as needed for the acquisition and development of the Austin Campus Consolidation project.</p> <p><i>This rider is recommended for deletion as this authority is no longer necessary.</i></p>
45	VII 31	<p>45. Port Access Improvements. Out of amounts appropriated to the Department of Transportation by this Act, an amount not to exceed \$20,000,000 in each fiscal year of the 2018-19 <u>2020-21</u> biennium from any available source of revenue and/or balances in Texas Mobility Fund No. 365 shall be allocated to provide funding for public roadway projects selected by the Port Authority Advisory Committee and approved by the Texas Transportation Commission to improve connectivity to Texas ports.</p> <p><i>This rider has been revised to update the biennial references.</i></p>

3.B. Rider Revisions and Additions Request (continued)

48	VII 31-32	<p>48. Aviation Fleet Replacement.</p> <p>a. Notwithstanding Article IX, §12.01, Aircraft, of this Act, and Rider 2, Capital Budget, of the Texas Department of Transportation bill pattern, from the non-dedicated portion of State Highway Fund No. 006 appropriated above to the Department of Transportation, an amount not to exceed \$10 million may be used by the department during the 2018-19 biennium for the purpose of purchasing replacement aircraft for the Texas Aviation Fleet.</p> <p>b. Notwithstanding Article IX, §8.03, Surplus Property, of this Act, and Rider 26, Sale of Surplus Property, of the Texas Department of Transportation bill pattern, in addition to the amounts in subsection (a), all amounts received during the 2018-19 biennium from the sale of state aircraft controlled and operated by the Department of Transportation pursuant to Chapter 2175, Government Code, or the sale of real property are appropriated to the Department of Transportation for the purpose of purchasing replacement aircraft for the Texas Aviation Fleet. If the amounts of proceeds received from the sale of state aircraft controlled and operated by the Department of Transportation and/or the sale of real property that are available for appropriation and expenditure under this subsection exceed \$10 million, then the amount allocated under subsection (a) shall be reduced so that the total amount allocated during the 2018-19 biennium for the purpose described by this rider may not exceed \$20 million.</p> <p>c. A finding under Article IX, §12.01(d), Aircraft, of this Act, is not required for expenditures made in accordance with this rider.</p> <p><i>This rider is recommended for deletion as this authority is no longer necessary.</i></p>
49	VII 32	<p>49. Appropriation: Lease/Purchase of Intelligent Transportation System. In accordance with Government Code Chapter 1232, the Texas Public Finance Authority shall, on behalf of the Texas Department of Transportation, finance through the issuance of lease revenue obligations in an aggregate amount not to exceed \$32,000,000 to finance an Intelligent Transportation System. The net proceeds of obligations issued under this provision are appropriated to the Department of Transportation in the 2018-19 biennium for the construction, acquisition, and installation of an Intelligent Transportation System at the International Ports of Entry at the Bridge of the Americas and the Zaragoza Bridge in El Paso to increase security measures and expedite trade.</p> <p><i>This rider is recommended for deletion as the Department does not have the statutory authority for this project.</i></p>

3.B. Rider Revisions and Additions Request (continued)

XX		<p><u>xx. Austin Campus Consolidation.</u> Notwithstanding other capital budget provisions contained elsewhere in this Act, the Texas Public Finance Authority is hereby authorized to issue revenue bonds or other obligations on behalf of the Texas Department of Transportation in an amount not to exceed \$326,000,000 for the purpose of constructing and equipping its Austin Campus Consolidation project on land owned by the Department in southeast Austin for such purpose. From the proceeds of the issuance and sale of such bonds or other obligations, such amounts as may be necessary to fund associated costs, including the cost of issuance, reasonably required reserved funds, capitalized interest, and other administrative costs are hereby appropriated to the Texas Public Finance Authority. From the remaining proceeds of the issuance and sale of such bonds or obligations, such amounts as may be necessary to fund the costs of the construction and equipping of the Austin Campus Consolidation project are hereby appropriated to the Department the fiscal year beginning September 1, 2019. Any unexpended balances in the appropriation made herein and remaining as of August 31, 2020 are appropriated for the same purposes for the fiscal year beginning September 1, 2020.</p> <p>Included in the amounts appropriated above out of the State Highway Fund for Strategy E.1.1, Central Administration, the amounts of \$4,200,000 for fiscal year 2020 and \$19,600,000 for fiscal year 2021 may be expended only for the purpose of making lease payments to the Texas Public Finance Authority for debt service payments on the revenue bonds or other revenue obligations issued to construct the Austin Campus Consolidation.</p> <p><i>This rider is recommended to fund the new campus construction through TPFA.</i></p>
XX		<p><u>xx. Unexpended Balances Appropriation: Construction of Buildings and Facilities and Repair or Rehabilitation of Buildings and Facilities.</u> Any unobligated and unexpended balances of funds remaining as of August 31, 2019, that were appropriated to the Department of Transportation for the 2018-19 biennium for capital budget items in Construction of Buildings and Facilities capital budget category (estimated to be \$0) and in the Repair or Rehabilitation of Buildings and Facilities capital budget category (estimated to be \$0) are appropriated for the fiscal biennium beginning September 1, 2019, for the same purpose.</p> <p><i>This rider is recommended to allow for UB authority for these capital items.</i></p>
XX		<p><u>xx. Limitation on Employment Levels.</u> The Department of Transportation may, without the approval required under Article IX, Section 6.10 of this Act, use the funds appropriated in this act to temporarily, in a single quarter, pay all or part of the salaries or benefits of a number of employees which would cause the number of full-time equivalent employees (FTEs) paid from funds appropriated by this Act to reach one hundred and three percent (103%) of the FTE figure indicated for the agency. The Department of Transportation shall submit a plan to comply with the provisions of Article IX, Section 6.10 of this Act to the Legislative Budget Board for any excess of fifty (50) FTEs or greater.</p> <p><i>This rider is recommended to provide greater flexibility in filling open positions.</i></p>

**3.B. Rider Revisions and Additions Request
(continued)**

XX		<p><u>xx. Appropriation of Transportation Infrastructure Fund Interest Earnings.</u> All interest earnings in the Transportation Infrastructure Fund (estimated to be \$3,400,000) are appropriated to the Department of Transportation for the purpose of making grants to counties affected by increased oil and gas production pursuant to Transportation Code, Chapter 256, Subchapter C, for the biennium beginning September 1, 2019.</p> <p><i>This rider is recommended to provide appropriation authority to the interest earned in the Transportation Infrastructure Fund.</i></p>

\$311,852,000	\$307,378,000
----------------------	----------------------

DESCRIPTION / JUSTIFICATION:

The 85th Legislature appropriated Proposition 7 funds to pay for the debt service on Proposition 12 bonds, pursuant to Rider 42 of the FY 2018-2019 GAA. Increased GR funding to pay for Proposition 12 bond debt service would allow approximately \$619 million in planned funding to be used to deliver highways listed in the UTP. Approximately \$312 million in FY 2020 and \$307 million in FY 2021 is estimated to pay Proposition 12 bond debt service.

EXTERNAL/INTERNAL FACTORS:

The GO Bond appropriation was reduced in the 2018-19 GAA. This item is intended to restore the GR funding for debt service on the GO bonds.

\$11,140,000

DESCRIPTION / JUSTIFICATION:

TxDOT currently waives charges on certain Texas toll roads for individuals whose specialty license plates display the words “Disabled Veteran,” “Purple Heart” or “Legion of Valor.” TxDOT began waiving tolls for qualified veterans on all of its state-operated roads beginning in late December 2012. TxDOT requests \$9.285 million in FY 2020 and \$11.14 million in FY 2021 of GR to pay for exemptions to qualified veterans who use TxDOT-operated toll roads. In the Austin area, qualified veterans are able to drive free of charge on Loop 1, SH 45 North, SH 45 Southeast and SH 130 (Segments 1-4). TxDOT must reimburse the Central Texas Turnpike System (CTTS) to comply with bond agreements. TxDOT has been using funding from toll concessions to pay for reimbursements in recent years, but the funding will not be sufficient in future years; therefore, TxDOT is requesting \$20.4 million of GR for the FY 2020-2021 biennium to support legislative requests to exempt certain qualified veterans from toll charges on CTTS roads.

EXTERNAL/INTERNAL FACTORS:

House Bill 3139, passed by the Legislature in 2009 and enacted in the Transportation Code (Section 372.053), stated that the state's toll authorities may develop a discount program for various veterans. TxDOT must reimburse the Central Texas Turnpike System (CTTS) for the difference in toll revenue from the rate change to comply with the bond covenant. The cost continues to rise in part as TxDOT is unable to limit the number of vehicles an individual can register under this Chapter and all such registered vehicles must receive the discount according to statute.

	Item Name: Rail-SORR Rehab Sulfur/Ft Stockton Item Priority: 3 IT Component: No Anticipated Out-year Costs: No Involve Contracts > \$50,000: No Includes Funding for the Following Strategy or Strategies: 04-01-03 Rail Construction		
OBJECTS OF EXPENSE:			
5000	CAPITAL EXPENDITURES	12,800,000	0
	TOTAL, OBJECT OF EXPENSE	\$12,800,000	\$0
METHOD OF FINANCING:			
1	General Revenue Fund	12,800,000	0
	TOTAL, METHOD OF FINANCING	\$12,800,000	\$0

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$12.8 million in GR for FY 2020 and unexpended balance (UB) authority in FY 2021 for the rehabilitation of the state-owned South Orient Railroad (SORR) between Sulfur Junction and Fort Stockton (16 miles). This section of the rail line is constructed of rail manufactured in 1912 that is substandard for today's loadings and has a significant number of defective crossties, bridge defects and obstructed drainage ditches. Such conditions limit train speeds to 10 mph. This section of the rail line requires rehabilitation in order to continue to provide safe and efficient service to the seven customer facilities that are served within the project limits. Rehabilitation of this section will also increase efficiency and capacity, allowing increased freight rail movements in an energy resource area of Texas that is experiencing significant truck traffic volumes. TxDOT will require Texas Pacifico (the private operator) to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state.

EXTERNAL/INTERNAL FACTORS:

The rail line must be rehabilitated between Sulfur Junction and Fort Stockton to support continued economic development and the resurgence of the energy resources in the region. Improving the rail line will increase track capacity and allow the diversion of some truck freight to rail.

The rehabilitation projects that have been completed since 2009 have increased annual carloads from an average of 2,031 (2001 - 2009) to over 45,000 (2017). This equals the diversion of 172,000 loaded trucks to rail (and the 172,000 empty truck returns) since a railcar can transport the same amount of freight as 4 trucks. This diversion contributes to reduced pavement maintenance costs and vehicular safety on the roadways as well.

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$8 million in GR for FY 2020 and unexpended balance (UB) authority in FY 2021 for the rehabilitation of the SORR between Fort Stockton and Belding (10 miles). This section of the rail line is constructed of rail manufactured in 1912 that is substandard for today's loadings and has a significant number of defective crossties, bridge defects, and obstructed drainage ditches. These conditions limit train speeds to 10 mph. This section of the rail line requires rehabilitation in order to continue to provide safe and efficient service to the customer facilities that are served within the project limits, which includes a siding that has been used for pipe transloading and could be used for sand transloading. Rehabilitation of this section will increase efficiency and capacity by allowing increased freight rail movements in an energy resource area of Texas that is experiencing significant truck traffic volumes. TxDOT will require Texas Pacifico to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state.

EXTERNAL/INTERNAL FACTORS:

The rail line must be rehabilitated between Sulfur Junction and Fort Stockton to support continued economic development and the resurgence of the energy resources in the region. Improving the rail line will increase track capacity and allow the diversion of some truck freight to rail.

The rehabilitation projects that have been completed since 2009 have increased annual carloads from an average of 2,031 (2001 - 2009) to over 45,000 (2017). METHOD OF FINANCING:			
1	General Revenue Fund	3,000,000	0
	TOTAL, METHOD OF FINANCING	\$3,000,000	\$0

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$3 million in GR for FY 2020 and UB authority in FY 2021 for SORR rehabilitation from Paisano Junction to Presidio International Rail Bridge (72 miles). The federal government awarded TxDOT \$7 million in federal FASTLANE grant funding for the rehabilitation of the segment in 2017. Texas Pacifico will reconstruct the international rail bridge at Presidio in FY 2019 to enable the reopening of this rail gateway on the South Orient line. The section of the rail line from the international rail bridge to the interchange with Union Pacific outside Alpine is limited to 10 mph speeds due to defective crossties, bridges and obstructed drainage ditches. The rail line requires rehabilitation in order to make the South Orient competitive with trucks and other border gateways. TxDOT needs a total of \$10 million to fund this rehabilitation, requiring an additional \$3 million in GR (this request) to supplement the \$7 million FASTLANE grant. TxDOT will require Texas Pacifico to maintain the line in the rehabilitated condition once TxDOT's project is complete, making this a one-time investment. Texas Pacifico will maintain the improvements in the same condition in perpetuity at no additional cost to the state. Rehabilitation is essential to establish international service, providing another international rail gateway and for economic development activities in the region.

EXTERNAL/INTERNAL FACTORS:

The SORR has 1 of 8 rail bridge locations between the U.S. and Mexico, most of which are at or near capacity. The lessee, Texas Pacifico, has agreed to reconstruct the international rail bridge at Presidio in 2019. The track and bridge conditions must be rehabilitated before this international gateway is reopened. This will provide an additional corridor for NAFTA traffic between the U.S. and Mexico and enable the interchange of international freight with Union Pacific at Paisano Junction and BNSF eastward at San Angelo Junction. The additional funding is needed to supplement the federal FASTLANE grant which is not adequate to meet all needs.

	500,000	0
--	---------	---

TOTAL, METHOD OF FINANCING

	\$500,000	\$0
--	------------------	------------

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$500,000 in GR for FY 2020 and UB authority in FY 2021 for the development of border inspection and security facilities for the SORR at Presidio. Texas Pacifico will reconstruct the international rail bridge in 2019 to enable international traffic through the Presidio rail gateway. U.S. Customs and Border Patrol will not permit any freight to cross the border until there are adequate facilities for the inspection of trains and their contents. Funding must be secured for the border inspection facilities in order to begin international freight rail service on the SORR.

EXTERNAL/INTERNAL FACTORS:

A border inspection facility is required to allow international freight via the South Orient rail line at Presidio. U.S. Customs and Border Patrol require an adequate facility for inspection of trains and their contents and will not provide funding for any inspection facilities. No railcars will move across the international border at Presidio if a border inspection facility is not provided. TxDOT does not have a source of funding for the development of the facility.

1	General Revenue Fund	4,000,000	4,000,000
TOTAL, METHOD OF FINANCING		\$4,000,000	\$4,000,000

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$4 million in GR for each year of the upcoming biennium to increase the Aviation Facilities Development Program (AFDP) and Routine Airport Maintenance Program (RAMP), which support 278 Texas general aviation airports. Airport development needs at these airports exceed annual budget allocations by 68 percent. Funding for both programs has been level for the past seventeen years, resulting in a 51 percent decrease in purchasing power due to increases in construction costs. TxDOT would allocate the proposed funding annually as follows: \$3,200,000 to AFDP and \$800,000 to RAMP.

EXTERNAL/INTERNAL FACTORS:

Many Texas general aviation airports are having airport development projects postponed, phased, or condensed due to inflation and the 51% decrease in purchasing power the Airport Facilities Development Program has experienced. Current funding levels are not adequate to meet airport development and maintenance needs of general aviation airports in the Texas Airport System Plan. Funding for airport development and routine airport maintenance projects would be made in accordance with Texas Transportation Code, Chapter 21.

1	General Revenue Fund	41,000,000	41,000,000
TOTAL, METHOD OF FINANCING		\$41,000,000	\$41,000,000

DESCRIPTION / JUSTIFICATION:

In the past year, the Public Transportation Advisory Committee (PTAC) reviewed existing transit service coverage and hours of operation in state-funded Urban and Rural Transit Districts across Texas. TxDOT's Public Transportation Division and the Texas A&M Transportation Institute researched options for increasing transit service coverage and hours of service on weekdays and Saturdays.

For the next biennium, PTAC recommends a funding increase of \$41 million per year to provide 14-hour/day weekday service for Texans in all counties and cities covered by a transit district. This is a committee priority for lifeline service that TxDOT and the PTAC hope can be addressed in the upcoming session, with an eye toward achieving a longer-term goal of 8-hour Saturday service and 14-hour weekday service statewide.

Transit provides lifeline services for many Texans. More than 70% of the approximately 30 million passenger trips taken on state-funded systems each year are for three primary purposes: work, shopping and medical visits. The increase would provide additional funding to create a 14-hour service day Monday- Friday statewide, plus annual funding to address the wear and tear on fleet vehicles associated with the increased service levels.

TxDOT is requesting \$41 million in GR for each year of the biennium to assist with fleet replenishment and formula funding. Additional state funding will partially offset the loss of purchasing power and population growth in rural areas. TxDOT will use these funds to match the growth in federal funds and improve services for the six million people living in rural Texas by improving access to employment, education, medical services and other necessities of daily life. If not approved, transit services will not be able to keep pace with the growing need and changing demographics, and rural residents will, over time, lose connectivity to services that address their needs.

TOTAL, METHOD OF FINANCING		\$125,000,000	\$0

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$125 million in GR for FY 2020 and UB authority in FY 2021 for the Texas Ports Capital Program. The funds requested will allow Texas ports to make critical capital improvements that support port activity such as multi-modal connectivity enhancements, port expansions and replacement of outdated and failing port facilities. If funded, these projects will support improved logistics, increased capacity and enhanced safety to keep Texas ports competitive.a vital role in creating jobs for Texans.

EXTERNAL/INTERNAL FACTORS:

Many Texas ports have exhausted their funding tools and are beginning to fall behind competitor ports that have received state funding . Funding for port capital improvement and infrastructure projects would be made in compliance with Transportation Code, Chapter 55.

--	-------------	---

TOTAL, METHOD OF FINANCING

	\$450,000,000	\$0
--	----------------------	------------

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$450 million in FY 2020 and UB authority in FY 2021 to capitalize the Ship Channel Improvement Revolving Fund. With the requested funding, the commission would make loans available to navigation districts with ship channel improvement projects authorized by Congress to deepen or widen channels. Navigation districts serve as the non-federal sponsor for ship channels and share a portion of the cost of improvement projects along with the United States Army Corps of Engineers .

Container vessels, tankers and cruise ships have gotten progressively larger over the past several years, with the 2016 expansion of the Panama Canal exacerbating this trend. In order to remain competitive, Texas ports must deepen and widen the ship channels that serve their facilities to accommodate larger vessels. The cost of each project can total hundreds of millions of dollars, with one Texas project totaling over one billion dollars.

There are five eligible ship channel projects with navigation districts serving as non-federal sponsors responsible for funding a percentage of their project cost. This funding request is intended to cover the estimated drawdown for the eligible projects in Fiscal Years 2020-2021.

EXTERNAL/INTERNAL FACTORS:

The 85th Texas Legislature passed Senate Bill (SB) 28 establishing the Ship Channel Improvement Revolving Fund to finance qualified projects for navigation districts to deepen or widen ship channels, provided the project is authorized by the U.S. Congress. There is currently a \$96 billion backlog of authorized projects awaiting federal appropriations. The SCIRF will serve as a financial tool for navigation districts to start projects while they await federal funding.

4,000,000

TOTAL, METHOD OF FINANCING

\$6,000,000

\$4,000,000

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$6 million in FY 2020 and \$4 million in FY 2021 for a limited amount of track and bridge rehabilitation on the Northeast Texas Rural Rail Transportation District (NETEX) freight rail line from Greenville to Mount Pleasant (66 miles). TxDOT owns 31 miles of the NETEX ROW and has a security interest in the infrastructure resulting from a grant funding agreement in 1996. Track speeds on the NETEX line are limited to 10 mph due to defective crossties and bridge deficiencies. The rail line continues to deteriorate due to the lack of past rehabilitation and funding. The rail line requires rehabilitation in order to continue providing service to existing customers and to attract new business to the line and the region. TxDOT would seek additional ownership of the line and infrastructure as a condition to expend funds for rehabilitating the line.

EXTERNAL/INTERNAL FACTORS:

The state has invested \$2.3 million in acquiring the NETEX line from Wylie to Sulfur Springs to prevent its abandonment. The USDA provided an additional \$1.5 million to NETEX for their purchase of the line from Sulfur Springs to Mt. Pleasant. NETEX' customer base employs over 4,000 Texans in the region. Significant investments for rehabilitation of the line must be made or it may become inoperable, which would make the prior investments irrelevant. Loss of service may also jeopardize shippers' employment levels as well as the continued employment of Blacklands' staff.

TOTAL, METHOD OF FINANCING

\$2,500,000

\$2,500,000

DESCRIPTION / JUSTIFICATION:

TxDOT requests \$2.5 million in GR for each fiscal year of the biennium to provide a continued subsidy of Amtrak's Heartland Flyer passenger train between Fort Worth and Oklahoma City. TxDOT and the Oklahoma Department of Transportation (ODOT) have jointly funded this passenger service since 2009. It could cease operations if TxDOT does not continue to provide the subsidy.

EXTERNAL/INTERNAL FACTORS:

Amtrak is the only rail system providing intercity passenger rail service in Texas. The Heartland Flyer is a state-subsidized route, funded jointly by TxDOT and the Oklahoma Department of Transportation. The Heartland Flyer provides service between Fort Worth and Oklahoma City, with a stop in Gainesville, Texas, as well as 4 other cities in Oklahoma. The Heartland Flyer also provides connectivity to the Texas Eagle at Fort Worth, which is a long-distance passenger train operating between San Antonio and Chicago. The Heartland Flyer will cease operations if either state fails to provide the required subsidy.

PROJECT DESCRIPTION

General Information

IMD maintains and supports the Texas Department of Transportation (TxDOT) network and by extension enables TxDOT operations to run efficiently and securely. Proper network architecture and tools keep TxDOT mission-critical functions running during emergencies, outside threats, and vendor outages. The Continuity of Operations Capability includes critical maintenance and enhancements necessary to keep the network available, high performing, and secure.

PROJECT DESCRIPTION

General Information

IMD will help TxDOT meet its ambitious goal of delivering more than \$70 billion in new projects in the next 10 years by investing in the digital tools to make TxDOT employees more productive. Currently, TxDOT employees are facing barriers to productivity such as manual and outdated processes, siloed systems, and dual entry requirements. IMD receives regular requests from TxDOT business areas to implement innovative improvements to remove these barriers and support greater efficiency and effectiveness. The Digital Services capability will invest in proven tools and systems to continue moving TxDOT toward modern, automated, and cost-effective ways delivering services.

Project number:	4	Project Name:	Internet of Things

PROJECT DESCRIPTION

General Information

Internet of Things refers to a connected network of devices and sensors that send and receive valuable information. TxDOT was an early adopter of this technology and now maintains a network of over 10,000 traffic cameras, sensors, and other connected devices to manage traffic congestion and improve public safety. In FY18 and 19, as part of the Intelligent Traffic System Network Integration, IMD partnered with the Traffic Operations Division and the Districts to pilot and deploy a new network monitoring system, and a new system for mapping and tracking fiber assets. TxDOT also began an effort to upgrade and standardize equipment on its traffic networks. FY20-21 efforts will enable completion of these and other critical projects to enable smarter and more efficient infrastructure.

PROJECT DESCRIPTION

General Information

The Modernization Portfolio and Project Management (MPPM) capital program will refine numerous fragmented business processes and functions supported by multiple applications and integrate them into one enterprise project and portfolio management system. Business functions included in this effort cross over several divisions and all districts statewide. The primary goal of this project is to consolidate business processes to create consistent and standardized functionality. This effort will promote collaboration with all business users and provide one system as a single source of truth for efficient and accurate data reporting. It will also provide standardized reporting for quick, efficient, and accurate information.

Project number:	13	Project Name:	EIM

PROJECT DESCRIPTION

General Information

Enterprise Information Management (EIM) is the program of business processes, governance, policies, and technologies used to manage TxDOT's information. EIM improves access to high quality, secure information that meets the knowledge, operational and reporting needs of the agency. In FY18-19, the EIM program is building the foundation to transform TxDOT into a truly information-driven agency. FY20-21 efforts will enable the agency to implement additional EIM initiatives to rapidly, accurately and openly share data internally and with the public.

The EIM program enables the management of information and a single source of truth to improve visibility and enable insights to the stakeholders. Additionally, it lowers costs in both productivity and storage by increasing collaboration and avoiding duplication. The EIM Roadmap captures a high-level plan on how to achieve the future state over eight years, as well as a detailed plan of projects to initiate during the 20-21 biennium. Additionally, a two-year roadmap was created that shows a detailed set of work stream artifacts related to the project. EIM's value is in bringing structured and unstructured data together to improve visibility and enable insights. This value is recognized through the interoperability of efforts that exist under the EIM umbrella.

PROJECT DESCRIPTION

General Information

The Texas Administrative Code Chapter 202 outlines regulations that agencies must adhere to for implementing and enforcing the appropriate controls. TxDOT IMD continually develops security capabilities, implementing required and additional controls to reduce security incidents and overall risk while raising the maturity level of TxDOT's security program. Areas of focus include identity management, policy alignment, data encryption, application security, and network security. The program will continue to align policies, mandates and regulations to actionable technical controls, use key performance indicators to measure effectiveness, and further mature security policies and procedures. The Security Capability also includes improvements to highly transactional processing that will leverage emerging technology to provide improved transparency, workflow, audit trails, reporting, and fraud prevention.

PROJECT DESCRIPTION

General Information

The purchase of new acreage for district headquarters, area engineering/maintenance and maintenance facilities. Existing facilities may be expanded by the purchase of adjoining land, where feasible & cost effective. If adjoining land cannot be purchased, then a new site is acquired. The size of new sites vary from a minimum of 15 acres for a maintenance site to 20 acres for a combined maintenance and engineering site. District headquarter sites must be a minimum of 30 acres. Sites are purchased in an area where adjoining land usage is compatible with TxDOT operations.

REVENUE GENERATION / COST SAVINGS

<u>REVENUE COST FLAG</u>	<u>MOF CODE</u>	<u>AVERAGE AMOUNT</u>
---------------------------------	------------------------	------------------------------

Explanation: Cost savings could not be calculated, however, size of site affects operational efficiency and increases safety risks for employees and visitors. The larger sites will replace an over utilized site and will allow for more storage of roadway materials thus reducing stock piles on highway right of way. These new sites will allow for the replacement of older facilities that have exceeded their useful life and have become functional obsolete.

Project Location: Various sites throughout the State which are utilized in support of regional district headquarters, highway maintenance and construction operations in the county in which they are located.

Beneficiaries: Traveling public, agency personnel and residents in the vicinity of the sites.

Frequency of Use and External Factors Affecting Use:

Upon completion of facilities on these sites, agency employees and external customers will use daily.

Upon completion of new workshops, agency employees will use daily.

5.B. Capital Budget Project Information
86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 8/10/2018
TIME: 11:30:57AM

Agency Code:	601	Agency name:	Department of Transportation
Category Number:	5002	Category Name:	CONST OF BLDGS/FACILITIES
Project number:	40	Project Name:	New Pampa Area Eng/Maint Facility

PROJECT DESCRIPTION

General Information

Project includes constructing new offices, vehicle and equipment service bays and material storage facilities to support roadway construction and maintenance activities in Carson, Gray, Hemphill, Lipscomb, Ochiltree and Roberts Counties. The larger site will replace an over utilized site providing a safer and more economical operation. The new site will also allow for more storage of roadway materials thus reducing stock piles on highway right of way. The proposed project will replace the older facilities that have exceeded their useful life and have become functionally obsolete.

Explanation: This equipment is comprised of truck mounted cranes for roadway sign and signal maintenance. Equipment necessary to replace unit(s) which meet usage, age, and repair cost criteria for retirement.

Project Location: Requesting Districts/Divisions

Beneficiaries: General Traveling Public

Frequency of Use and External Factors Affecting Use:

Equipment will support daily roadway maintenance operations.

Annual usage is subject to seasonal variances and workload demands.

B. Assessment of Fiscal Year 2016 - 2017 Efforts to Meet HUB Procurement Goals

Attainment:

The agency attained or exceeded 2 of 6, or 33%, of the applicable statewide HUB procurement goals in FY 2016.

The agency attained or exceeded 2 of 6, or 33%, of the applicable statewide HUB procurement goals in FY 2017.

Applicability:

The Texas Department of Transportation's (TxDOT) Historically Underutilized Business (HUB) goals are based on the state-wide annual HUB utilization goals for the six procurement categories established by the Texas Comptroller of Public Accounts (CPA). However, HUB provisions do not apply to a majority of TxDOT's annual expenditures related to heavy construction. Government Code §2161.004(c) removes the applicability of the HUB program from projects or contracts subject to Transportation Code §201.702. Projects subject to this section of the Transportation Code are required to follow federal regulations related to the Disadvantaged Business Enterprise (DBE) program.

Factors Affecting Attainment:

Heavy Construction

TxDOT is required to establish a DBE Program and set goals on federal-aid contracts. TxDOT's annual consolidated report shows considerable spending in heavy construction. The report does not capture additional spending with small, minority, and women owned business that have the DBE certification. DBE goals that are reported to the FHWA capture contract awards and commitments, while the HUB report captures actual expenditures as its main focus.

Special Trade Construction

Agency Code: **601** Agency: **Department of Transportation**

TxDOT has improved its process for assigning appropriate Object Codes, which impacted the payments identified in this category.

Other Services

TxDOT is developing resources for TxDOT staff to identify HUBs on term contracts. TxDOT will continue to implement HUB policies to ensure HUBs are considered for contracting opportunities.

Commodities

Term contracts and the state Set-Aside Program require TxDOT to use these specific contracts for applicable goods and services. TxDOT is developing a blanket contract for selected items purchased using the payment card program, improving resources for TxDOT staff to identify HUBs on term contracts and local HUB vendors for use by PCard users.

"Good-Faith" Efforts:

TxDOT made the following efforts to comply with the statewide HUB procurement goals per Texas Administrative Code, Title 34, §20.13(c):

- Implemented HUB Program policies and standard operating procedures, including training for TxDOT staff.
- Conducted regular meetings with TxDOT divisions to develop methods to increase HUB utilization in procurement opportunities.
- Participated in outreach initiatives that provided training and technical assistance to showcase opportunities and resources for small businesses and how to do business with TxDOT.
- Hosted Internal Forums for HUB and DBE firms to present their businesses to TxDOT staff.
- Participated in statewide Economic Opportunity Forums to provide HUB and DBE firms procurement and contracting information.
- Managed seven HUB Mentor Protégé relationships.
- Increased number of DBEs receiving HUB certification as part of a Memorandum of Agreement with the CPA.

SUMMARY OF SPECIAL CONCERNS/ISSUES

Assumptions and Methodology:

Federal fund estimates reflect the use of innovative financing techniques including tapered match and advance construction/partial conversion. These estimates of reimbursements reflected in the LAR are based on a projection of expenditures and an estimate of Texas' Obligation Authority, which in turn is based upon a projection of the number of gallons of fuel sold in the state.

For additional CFDA descriptions please reference the following federal government web site:
<https://www.cfda.gov/>

Potential Loss:

The only potential loss is a complete governmental shutdown. In which case, projects would be delayed until funding is received.

Description and Justification for Continuation/Consequences of Abolishing

The Aviation Advisory Committee is composed of nine members appointed by the Texas Transportation Commission to advise the Commission and the department on aviation matters. The committee is created under Transportation Code 21.003. The majority of members must have at least five years of successful experience as an aircraft pilot, or an aircraft facilities manager or a fixed-base operator. The committee must meet once a year, and on average, meets three or four times a year. Authority to reimburse travel expenses to advisory committee members was eliminated by the 78th Legislature.

The committee provides a direct link for a general aviation users' input into the Texas Airport System. This forum provides for an exchange of information between the state and the citizens to convey their needs and ideas for economic development of the aviation system. These members, as representatives of the Aviation Division, are able to furnish data on resources available to aviation users. Additionally, the committee is a direct source of information to the Commission for determination of the viability and effectiveness of the aviation program.

Abolition of the committee would make it more difficult and possibly more costly for the department to learn the needs of aviation users for implementation into the airport program; thereby, the effectiveness of the aviation program would be diminished. The Commission would not have a direct source of information outside the department for evaluation of the state aviation program. This committee was continued through December 31, 2019 by affirmative vote of the Texas Transportation Commission, Minute Order No.115099.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/10/2018
Time: 11:31:02AM

Agency Code: **601** Agency: **Department of Transportation**

Description and Justification for Continuation/Consequences of Abolishing

Senate Bill 370, 75th Legislature, 1997 required the department to create a Port Authority Advisory Committee (PAAC) to advise the Texas Transportation Commission and the department on matters relating to port authorities. Authority to reimburse travel expenses to advisory committee members was eliminated by the 78th Legislature.

In 2001, the 77th Legislature passed SB 1282 which added Chapter 55 to the Transportation Code, which created a second Port Authority Advisory Committee within the Department of Economic Development. In 2003, the 78th Legislature transferred the responsibilities of Chapter 55 to the Texas Department of Transportation.

The current Port Authority Advisory Committee is necessary for the implementation of Transportation Code, Chapter 55, which includes the development of a port mission plan and port capital program. The PAAC is the only committee representing ports and the maritime industry at a statewide level. The committee has produced the statutorily required reports and advised the agency in their role as it relates to ports. In particular, the Port Capital Program has included specific projects recommended for state investment from the Port Access Account Fund. The Strategic Mission Plan includes goals and objectives the committee recommends for the state.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/10/2018
Time: 11:31:02AM

Agency Code: **601** Agency: **Department of Transportation**

Description and Justification for Continuation/Consequences of Abolishing

Senate Bill 183, as passed by the 79th Legislature, pursuant to Transportation Code, §201.114, the Border Trade Advisory Committee was established to define and develop a strategy and make recommendations to the Texas Transportation Commission and Governor for addressing the highest priority border trade transportation challenges. In determining action to be taken on the recommendations, the commission shall consider the importance of trade with the United Mexican States, potential sources of infrastructure funding at border ports, and the value of trade activity in the department's districts adjacent to the border with the United Mexican States.

The abolition of this committee would deny the Texas Transportation Commission the reasonable input from interested border communities and stakeholders wishing to express opinions with regard to border trade issues and their impact on transportation. The committee's advice and recommendations provide the commission and the department with border trade information to be considered in formulating department policies concerning the Texas transportation system.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/10/2018
Time: 11:31:02AM

Agency Code: **601** Agency: **Department of Transportation**

Description and Justification for Continuation/Consequences of Abolishing

Pursuant to 43 TAC §1.86, the Texas Transportation Commission, by Minute Order 111294, March 31, 2008, created an advisory committee concerning the I-69 Corridor or a project that is part of the I-69 Corridor for the purpose of facilitating and achieving support and consensus from affected communities, governmental entities, and other interested parties in the planning of the I-69 Corridor and in the establishment of development plans for a project that is part of the I-69 Corridor. The committee must meet once a year, and on average meets three-four times a year. Authority to reimburse travel expenses to advisory committee members was eliminated by the 78th Legislature.

The abolition of this committee would deny the commission the reasonable input from interested corridor communities wishing to express opinions with regard to the I-69 Corridor and its impact on transportation. The committee's advice and recommendations provide the commission and the department with community concerns to be considered in formulating department policies concerning the Texas transportation system.

The committee is continuing to meet on a regular basis. (This advisory committee may be abolished at any time by the commission, but in no event may the committee continue beyond completion of the the project for which the committee is created.)

Description and Justification for Continuation/Consequences of Abolishing

The Texas Freight Advisory Committee (TxFAC) was established January 31, 2013 by Minute Order 1113421 to facilitate effective planning for freight transportation. The committee has 24 members made up of local and regional elected officials. Expenditures supporting TxFAC are part of the State Planning and Research (SPR) Federal Program and are 100% reimbursable.

The abolition of this committee would deny the Texas Transportation Commission input from interested communities and stakeholders wishing to establish and implement the Texas Freight Mobility Plan. The committee provides the commission and the department with freight mobility information and recommendations to be considered in formulating department policies concerning the Texas transportation system. The calculation of 36 members include 24 regular members and 12 ex-officio members who regularly attend the meetings.

In 2018, Hurricane Harvey caused significant damages to federal-aid highways. Record rains and flooding in multiple locations covered roadways and damaged multiple bridge structures. Fast-moving water contributed to severe erosion, slope failures and undermining of structures. Some locations experienced complete washouts of bridge approaches, culverts, slopes, or shoulders. Hurricane force winds, tornadoes, and flood damage includes, but is not limited to, damage to roadways, culverts, headwalls, wing walls, rip rap, guardrail, signal cabinets, and luminaires.

6.I. Percent Biennial Base Reduction Options

10 % REDUCTION

86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/10/2018
Time: 11:31:03AM

Agency code: 601 Agency name: Department of Transportation

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			PROGRAM AMOUNT		TARGET
	2020	2021	Biennial Total	2020	2021	Biennial Total	2020	2021	Biennial Total

1 C.2.1 Traffic Safety - CRASH records

Category: Across the Board Reductions

Item Comment: The fees collected are used to maintain the Crash Records Information System (CRIS). A 10% reduction would have a negative impact on CRIS upgrades and updates, more substantially in CRIS Help Desk Daily Operation.

Strategy: 3-2-1 Traffic Safety

General Revenue Funds

8042 Insurance Maint Tax Fees	\$0	\$0	\$0	\$170,780	\$170,780	\$341,560	\$170,780	\$170,780	\$341,560

FTE Reductions (From FY 2020 and FY 2021 Base Request)

2 D.1.4 Rail Safety

Category: Programs - Service Reductions (Other)

Item Comment: The rail safety program revenues are collected from Texas railroad operators in order to cover the costs associated with this program. A 10% reduction would compromise this program and result in fewer rail inspections which would place the public at a greater risk for rail accidents.

Strategy: 4-1-4 Ensure Rail Safety through Inspection and Public Education
